3. ***A select group of our customers contribute significantly to our revenues and failure to retain one or more of them will have an adverse effect on our financial performance and results of operations.***

During Fiscal 2011, Fiscal 2012, Fiscal 2013 and Fiscal 2014, our top 20 customers contributed approximately ₹256.33 million, ₹306.49 million, ₹443.66 million and ₹676.57 million constituting 56.75%, 49.92%, 39.02%, and 44.10%, respectively, of our total revenues. While our reliance on the said group of customers has reduced over time, we may continue to remain dependent upon them for a substantial portion of our revenues. In such an event, our failure to retain one or more of them will have an adverse effect on our financial performance and our results of operations.

Further, our dependence on select customers also results in a reliance on the industry segment in which these customers operate. To illustrate, Graviss Foods Private Limited, one of our top 20 customers is in the ice cream industry. If Graviss Foods Private Limited or the industry segment in which Graviss Foods Private Limited operates suffers a downturn, for any reason, our results of operations and our financial performance could be adversely affected. In addition, if the reputation of one of our customers is significantly impaired, it could potentially have a trickle-down effect on our business, results of operations and financial performance.

In addition, we enter into contracts with our customers which are generally subject to negotiations every year. Our reliance on a select group of customers may also constrain our ability to negotiate these agreements, which may have an impact on our profit margins and financial performance.

4. ***We face several risks associated with the setting up of our new warehouses which could hamper our growth and consequently our business and financial condition.***

A significant part of the Net Proceeds from the Issue is allocated for capital expenditure for setting up new temperature controlled warehouses and ambient warehouses. When setting up new warehouses, we may encounter cost overruns or delays for various reasons including delays in construction, delay in receiving government approvals and non-delivery of equipment by suppliers. If any warehouse proposed to be set up is not completed in a timely manner, or at all, our business and results of operations may be adversely affected. Further, our budgeted resources may prove insufficient to meet our requirements which could drain our internal accruals or compel us to raise additional capital which may not be available, on terms favourable to us, or at all.

In addition:

- we may not be able to recruit skilled and experienced personnel to set-up and operate our new warehouses in a timely manner; and

- the warehouse(s) we set-up may not achieve anticipated levels of profitability.

Any one, or a combination of these factors, could undermine the objects of this Issue and hamper our growth. The occurrence of any such event could adversely affect our business, financial condition, and results of operations.

5. ***We have not, as on date of this Red Herring Prospectus, obtained certain licenses or approvals for warehouses for which funds are being raised through the Issue. Any delay or an inability to obtain approvals may adversely impact our ability to set up the proposed warehouses and consequently have a detrimental impact on our growth prospects.***

As on the date of this Red Herring Prospectus, we have not obtained certain licenses or approvals from various authorities for operating the warehouses for which funds are being raised through the Issue. In addition, the consent to establish for our proposed warehouse M-32 at Taloja (near Mumbai) has been granted in favour of our lessor of the property on which we are constructing the warehouse and not our Company and such licence has not been transferred to us. If the relevant authorities determine that our Company may not operate our warehouses under the licence granted to the lessor, our Company will need to obtain separate licences to operate our warehouse in Mumbai. If we are unable to procure these approvals on time, or at all, we may be unable to set up the new warehouses according to our projected timelines or at all. Our inability to set up the new temperature controlled warehouses may have an adverse effect on our business and growth prospects. Further, our Company may be subject to penalties for establishing a warehouse without the requisite approvals which may adversely affect our business and financial condition.

6. ***We have not placed orders for certain plant and machinery for which funds are being raised through the Issue. Unavailability or increase in costs of the plant and machinery could adversely impact our financial condition and our growth prospects.***

We propose to utilise ₹1,282.81 million from the Net Proceeds towards capital expenditure, of which approximately ₹636.33 million constituting 45.34% of our total fund requirement towards capital expenditure will be spent on plant and machinery. As of July 31, 2014, we have not entered into definitive agreements or placed orders for the purchase of plant and machinery aggregating ₹117.34 million constituting 18.44% of the proposed expenditure in that regard. In addition, most of the quotations are time-bound and may be subject to revisions.

Further, certain portion of the expenditure on plant and machinery will be on imported equipment. Consequently, any significant foreign currency fluctuation may have an adverse impact on our project cost and any increase in costs in excess of our estimates may need to be funded through internal accruals or through debt which may not be available on favourable terms or at all. For further details please see the chapter entitled 'Objects of the Issue' on page 79 of this Red Herring Prospectus.

7. ***The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation in the estimates could affect our growth prospects.***

Our funding requirement including our long term working capital requirement is based on management estimates and has not been appraised by any bank or financial institution. Our funding requirements are based on our current business plan and may vary based on various factors including macroeconomic changes. In view of the dynamic nature of the industry in which we operate, we may have to revise our business plan from time to time and, consequently, the funding requirement and, the utilization of proceeds from the Issue may also change. This may also include re-scheduling the proposed utilization of Net Proceeds at the discretion of our management. We may make necessary changes to the utilisation of Net Proceeds in such cases in conformity with the provisions of the Companies Act in relation to the change in the objects in a public issue. In the event of any variations in actual utilization of funds earmarked for the above activities, any increased fund deployment for a particular activity may be met from funds earmarked from any other activity and/or from our internal accruals. Further, any such revision in the estimates may require us to revise our projected expenditure and may have a bearing on our expected revenues and earnings.

8. ***We have not entered into any definitive agreements to monitor the utilization of the Issue Proceeds.***

The SEBI ICDR Regulations stipulates the appointment of monitoring agency only where the issue size is in excess of ₹5,000 million. Since the Issue is for less than ₹5,000 million, we will not be appointing monitoring agency and the deployment of Net Proceeds as stated in chapter entitled 'Objects of the Issue' on page 79 of this Red Herring Prospectus, is not expected to be monitored by an independent

agency.

9. ***We are yet to receive certain regulatory approvals in respect of our operations. An inability to maintain licences and approvals may adversely affect our business and results of operations.***

We require various registrations, licences and approvals to operate our warehouses. Some of the more important approvals are in respect of environmental laws, registrations under the Factories Act, 1948, the Food Safety Standards Act, 2006 (FSSA) and in respect of contract labour. While we have obtained a significant number of approvals from the relevant authorities we are yet to receive certain approvals. We cannot assure you that we will receive these approval / clearances in time or at all. Additionally, we will need to apply for renewal of approvals which expire / seek fresh approvals, from time to time, as and when required in the ordinary course of our business. Further, the approvals and licences obtained by us may contain conditions, some of which could be onerous.

Further, we cannot assure you that the approvals, licences, registrations or permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licences, registrations or permits that has been or may be issued to us may adversely affect our business and results of operations.

If we are unable to timely obtain or maintain the necessary approvals, registrations or clearances, at present or in future, it may have an adverse impact on our business, results of operations and financial performance.

For details of regulatory approvals and licences of our Company, please see the chapter entitled 'Government Approvals' on page 294 of this Red Herring Prospectus.

10. ***If we are unable to effectively implement our business and growth strategies, our results of operations may be adversely affected.***

Our success will depend, in large part, on our ability to effectively implement our business and growth strategies. We cannot assure you that we will be able to execute our strategies in a timely manner or within budget estimates or that we will meet the expectations of our customers and other stakeholders. We believe that our business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Further, our business and growth strategies may require us to incur further indebtedness. Any inability to manage our business and growth strategies could adversely affect our business, financial condition and results of operations.

As part of our growth strategy, we propose to increase the number of warehouses that we operate by setting up warehouses in new geographic locations. There can be no assurance that we will be able to set up the new warehouses according to our projected timelines or at all. Failure to set up the warehouses on time, or at all, could materially impact our ability to achieve our goal of rapidly expanding our domestic footprint and penetrating hitherto untapped geographies.

Our inability to maintain our growth or failure to successfully implement our growth strategies could have an adverse impact on the results of our operations, our financial condition and our business prospects.

11. ***Conditions and restrictions imposed on us by the agreements governing our indebtedness could adversely affect our ability to operate our business.***

Our financing agreements include conditions and restrictive covenants that require us to obtain consents from respective lenders prior to carrying out specified activities and entering into certain transactions. Our lenders have certain rights to determine how we operate our businesses, which, amongst other things, restrict our ability to borrow additional debt, declare dividends or incur capital expenditures beyond prescribed thresholds, change the shareholding pattern/management of our Company, issue any guarantee, use other bank's facilities, enter into any derivative transactions, enter into any profit sharing agreements, make investments other than in the ordinary course of business, sell/transfer/lease/dispose substantial part of assets, and form or acquire any subsidiaries. We cannot assure you that we will be able to obtain approvals to undertake any of these activities as and when required or comply with such covenants or other covenants in the future.

Further, these debt obligations are typically secured by a combination of security interests over our assets and hypothecation of movables and future receivables. The security allows our lenders to sell the

relevant assets in the event of our default, convert outstanding debt into equity, nominate directors to our Board or exercise other such related rights.

Under such financing agreements, we are also required to comply with certain financial covenants, such as maintaining prescribed financial ratios at all times.

Further, if we incur more debt or if there is an increase in the applicable interest rates for our existing debt, our interest payment obligations will increase and we may become subject to additional conditions from lenders, including additional restrictions on the operation of our business. The financing agreements that we are party to, or which we may enter into in the future, may be unilaterally terminated by our lenders or the lenders could decline to lend to us under such agreements. Further, we cannot assure you that we will be able to raise additional financing on favourable terms, or at all. Any failure in the future to obtain sufficient financing could result in a lack of cash flow to meet our operating requirements and, therefore, could have an adverse effect on our business, financial condition and results of operations.

Further, the loans extended to us by our lenders are conditional upon the corporate guarantee extended by our Promoter, GDL. Pursuant to the Companies Act, 2013, our Promoter may be unable to extend such guarantees in the future. In the event our Promoter does not extend the necessary guarantee or if we are unable to find a guarantor to our lenders' satisfaction our ability to maintain and raise future debt could be adversely impacted. If we are unable to raise debt, we may not be able to meet our financing requirements for our expansion plans which could have an adverse effect on our business and results of operations. For further details please see the chapter entitled '*Financial Indebtedness*' on page 183 of this Red Herring Prospectus.

12. ***We operate a large number of our warehousing facilities on leased land. If we are unable to timely renew our leases or enter into fresh agreements on favourable terms or at all, our business, financial condition and results of operations may be adversely affected.***

As an integrated temperature controlled logistics service provider our temperature controlled warehouses are critical to our business. In Fiscal 2013 and Fiscal 2014, our temperature controlled warehousing business constituted 46.23% and 50.74% of our total revenues. Consequently, the lands on which our temperature controlled warehouses are located are crucial to our business. While we have, in the past, acquired the land on which our temperature controlled warehouses are located, with the increasing unavailability, and rising cost, of land, acquiring land is no longer economically viable. Accordingly, our more recent temperature controlled warehouses are located on lands that have been taken on lease. As on March 31, 2014, 13 of the 23 temperature controlled warehouses we operate were on properties taken on lease. While a majority of our leases are for around 20 years with a specified lock-in we could be required to relocate these temperature controlled warehouses, should the lease be terminated for any reason. Further, there can be no assurance that we will be able to timely renew the lease or enter into fresh agreements in future, on favourable terms, or at all.

In the event that any lease agreement is not renewed, we will be required to expend time and financial resources to locate suitable land to set up a temperature controlled warehouse, which may adversely affect our financial condition. Also, we may be unable to relocate a temperature controlled warehouse to an appropriate location in a timely manner, or at all. Further, there can be no assurance that a relocated temperature controlled warehouse will be as commercially viable.

If an agreement is terminated, prior to its tenure or if it is not renewed or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area which could adversely affect our market share and revenues.

13. ***We do not own the land on which our Registered Office is situated. Inability to timely renew the lease may have an adverse impact on our results of operations and financial results.***

Our Company does not own the land where our Company's Registered Office is situated. In terms of the lease agreement, our Company pays monthly rent for the land on which our Registered Office is situated. In the event the lease agreement is terminated prior to the expiry of the 20 year lease period or if we are unable to secure a renewal of the lease, we will be required to relocate both our Registered Office and our temperature controlled warehouse located on the same land for which we may be required to incur significant expenditure. In addition, identifying suitable land for the Registered Office and the temperature controlled warehouse could place significant demands on our senior management

and other resources. Any inability on our part to timely identify a suitable location for our registered office could have an adverse impact on our business.

14. ***We do not own a few of the trademarks that we use and also a logo related to our business and may, consequently, be unable to defend any infringement of our intellectual property rights.***

We believe that one of the key factors of our success is our brand recall. While our erstwhile trade name 'Snowman Frozen Foods' is registered, 'Snowman Logistics Limited' is yet to be registered. While we have made applications for registration of the name of our Company under the Trade Marks Act, 1999, with the relevant authorities, the process of registration in India is time-consuming and there can be no assurance that we will be granted the trademark, soon or at all. Further, we have received certain objections from the Trademarks Registry in respect of some of our trademark applications. If we are unable to obtain the requisite registration our intellectual property may be used by others including our competitors, thereby diluting our brand value and our goodwill. In addition, our ability to defend any infringement of our intellectual property rights may be hampered by lack of registration since we will only be able to initiate proceedings for passing-off (which are potentially more onerous to prosecute), which could adversely affect our brand, our goodwill and business prospects. For details of trademarks that we own, please see the chapter entitled 'Our Business' on page 115 of this Red Herring Prospectus.

15. ***Our temperature controlled distribution business is heavily reliant on third party service providers for the Reefer Vehicles and on the operators of these vehicles. Any lapse or failure on the part of these service providers could have a detrimental impact on our reputation and business prospects.***

Our temperature controlled distribution business is our second largest source of revenue and constituted 34.99% and 47.71% of our total revenue from operations for Fiscal 2013 and Fiscal 2014, respectively. As on March 31, 2014, we operated 370 Reefer Vehicles of which 307 were leased, either in part or full, from various third party service providers, which constituted 82.97% of our total operational fleet. We operate these leased vehicles pursuant to contracts, generally valid for a period of 18 months to 6 years, with third party service providers. In particular, we leased 297 vehicles constituting 96.74% of our entire contracted fleet from two service providers. If we are unable to timely renew the lease on the vehicles provided by these entities on similar terms or at all, we will be required to identify new service providers which, amongst others, will be time consuming. Further, if we are unable to procure the services of other service providers capable of adequately servicing our needs we may be compelled to purchase new vehicles which will require significant capital outlay. In addition, our inability to operate Reefer Vehicles for a reasonable length of time would have an adverse impact on our reputation, results of operations and financial performance.

Further, almost all the operators of the Reefer Vehicles including the drivers are engaged through third party contractors. While we consistently monitor the progress of the Reefer Vehicles en route, we have little control over these operators. In the recent past some of the drivers of our Reefer Vehicles were penalised for violation of certain laws. While we have contracts which assign liability to the third party service providers there can be no assurance that we will not be made party to the proceedings or that action will not be initiated against us. Further, if we are held liable for these violations our insurance cover may not be sufficient or even available. Any such event could have a significant impact on our reputation and, consequently, our business prospects and profits.

16. ***Failure in maintaining the requisite standard for storage of products warehoused with us / transported through us could have a negative impact on our business.***

We are required to maintain the requisite standard for storage of the products that we warehouse and transport. We achieve this through various means including by ensuring that our temperature controlled warehouses adhere to prescribed regulatory standards and deploying data loggers in our Reefer Vehicles to ensure continuous monitoring of temperature. However, if we consistently, or frequently, fail to maintain the prescribed and / or requisite standards at our temperature controlled warehouses or in our Reefer Vehicles, we may be unable to retain our customers which will have an adverse impact on our business, growth prospects and our financial results.

Some of the products warehoused and/or transported by us are perishable in nature. In the event that we fail to maintain the prescribed and / or requisite standards of storage or if the integrity of products that are warehoused or distributed is compromised, we could be in breach of our contractual obligations to our customers which could lead, amongst others, to monetary damages. For instance, we are presently in arbitration against one of our customers who has alleged that we failed to maintain the quality of the

ice-creams warehoused and distributed by us, which allegedly caused significant loss to the said customer. For further details, please see the chapter entitled 'Outstanding Litigation and Material Developments' on page 273 of this Red Herring Prospectus. In addition, given that a majority of the products handled by us are ultimately consumed by the general public we face potential public liability which may be significantly in excess of our insurance cover. Further, we may also face criminal liability in this respect.

17. ***Our operations are power intensive and our fuel expenses constitute a significant component of our operating costs. If we are unable to pass on the costs to our customers, our profit margins may be adversely affected.***

Continuous operation of the cold storage / refrigeration unit leads to high power consumption making profitability sensitive to power costs. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*]. Our temperature controlled warehouses consume significant amounts of electricity and the cost of electricity constituted 12.34% and 12.66% of our operating expenses for Fiscal 2013 and Fiscal 2014, respectively. We meet our power requirements through various sources, such as state electricity boards and back-up diesel generator sets. Any continuous or chronic interruption in power supply to our warehousing facilities will have a material adverse impact on our business and results of operations. Further, some of the states in which we operate suffer from an acute shortage of electricity, in particular during summer.

In addition, all our Reefer Vehicles and other vehicles operated by us run on diesel. Recently, the Government of India partially de-regulated diesel prices, consequent to which diesel prices have been steadily increasing. Any significant increase in the price of diesel will have a detrimental impact on our margins. While we attempt to pass on the cost to our customers by increasing our rates, there can be no assurance that we will be able to do so in part or in full, in future. Further, our inability to pass on the entire cost of electricity to our customers in the event of a significant rise in the unit cost of electricity could adversely affect our profit margins.

18. ***We have a large work force and our employee benefit expense is significant component of our operating costs. An increase in employee benefit expense could reduce our profitability.***

Our operations are highly dependent on our skilled and semi-skilled labour. Over the years, our employee benefit expense has been a significant component of our operating costs. In Fiscal 2012, Fiscal 2013 and Fiscal 2014, our employee benefit expense was ₹97.65 million, ₹129.32 million and ₹151.92 million, constituting 15.21%, 11.33% and 9.79%, respectively, of our total revenue. Due to economic growth in the past and the increase in competition for skilled and semiskilled employees in India, wages in India have, in recent years been increasing at a fast rate. Further, our proposed expansion plan to augment growth will also result in increase in our work force and may also necessitate increased levels of employee compensation. In addition, we may also need to increase our compensation levels to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Finally, many of our employees receive salaries that are linked to minimum wage laws in India and any increase in the minimum wage in any state in which we operate could increase our operating costs. In addition, a shortage in the labour pool or general inflationary pressures will also increase our labour costs.

A significant long-term increase in our employee benefit expense could reduce our profitability, which could, amongst others, impact our growth prospects.

19. ***We are heavily dependent on machinery for our operations. Any break-down of our machinery will have a significant impact on our business, financial results and growth prospects.***

Our warehousing and distribution businesses are heavily dependent on plant and machinery including air conditioners, data loggers, Reefer Vehicles, forklifts and ante trucks. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. Further, if we are unable to repair the malfunctioning machinery, our operations may need to be suspended until we procure machinery to replace the same. Any malfunction or break-down of our machinery may also cause the quality of products stored with us to be affected. Consequently, we may be liable for breach of our contractual obligations with our customers. Any breach of our obligations may result in termination of our contracts with our customers which could have an adverse impact on business, reputation and our financial results. Further, we may also be open to public liability from the end consumer for defects in the quality of the product.

20. ***Any failure of our information technology systems could adversely impact our business.***

Our day to day operations depend on our information technology systems. All our operations function under an ERP system and we rely heavily on our information technology systems including for tracking the status of products stored with us, temperature recordings as well as for tracking the movement of our Reefer Vehicles. We also use information technology systems for routine corporate activities such as processing of financial information, managing information pertaining to creditors/ debtors and engaging in normal business activities. Although we believe that we have effective backup systems in place, any partial or complete disruption of our information technology systems could adversely impact our business and the result of our operations.

21. ***Changes in technology may render our current technologies obsolete or require us to undertake substantial capital investments, which could adversely affect our results of operations.***

Technologies currently under development or that may be developed in the future, if employed by our existing competitors or new entrants, may adversely affect our competitiveness. The development and application of new technologies involve time, substantial cost and risk. Our competitors may be able to deploy new technologies, such as those pertaining to refrigeration, before us and we cannot predict how emerging and future technological changes will affect our operations or the competitiveness of our services. If we fail to successfully implement new technologies in a timely manner or at all, our business, financial condition and results of operations may be adversely affected.

22. ***Accidents could result in the slowdown or stoppage of our operations and could also cause damage to life and property.***

We believe that each of our warehouses and Reefer Vehicles has adequate equipments to ensure and meet necessary safety standards. However, certain accidents / mishaps may be unavoidable or may occur *inter alia* on account of negligence in complying with prescribed safety standards. Therefore, although we take all necessary steps to ensure safety, accidents, including human fatalities, may occur and there can be no assurance that our safety measures and the precautions undertaken will be completely effective or sufficient.

Further, although we maintain third party liability insurance, the liability incurred may far exceed the insurance cover. Any accident at our warehouses or involving our Reefer Vehicles could also harm our reputation. Such accidents, irrespective of the monetary liability, may have an adverse impact on our business and reputation.

23. ***We are heavily reliant on our key management personnel and persons with specialised technical know-how. Failure to retain or replace them will adversely affect our business.***

In order to successfully manage and expand our business, we are dependent on the services of key management personnel, and our ability to attract, train, motivate and retain skilled employees, including technicians and other professionals. In addition, the temperature controlled logistics business is highly technical in nature and requires personnel with specialized knowledge / skill-sets and in India, premier institutions of higher education catering to this technology are limited and personnel with the requisite expertise are not easily available. If we are unable to hire additional personnel or retain existing qualified personnel, in particular our key management personnel and persons with specialised technical know-how, our operations and our ability to expand our business may be impaired and our revenues may decline. Further, we may be unable to hire and retain enough skilled and experienced employees to replace those who leave or may not be able to re-deploy existing resources successfully. Failure to hire or retain key management personnel and skilled and experienced employees could adversely affect our business and results of operations.

24. ***If revenues from certain markets are adversely affected our results of operations and financial condition would be adversely affected.***

While we have a geographic presence across various cities and towns in India, we are heavily dependent on certain markets for our income from operations. We believe that as of March 31, 2014, Mumbai, Chennai and Bengaluru markets contributed significantly to our total revenues. If the share of our revenues from these cities reduces significantly, it may adversely affect our results of operations and financial condition.

25. ***A fall in purchasing power of retail consumers will hamper our growth and have an adverse impact on our revenues.***

Our growth is reliant on the purchasing power of the retail consumers catered to by our customers. Some of our top customers, in particular those customers operating in the FMCG sector are not suppliers of necessity goods, and, consequently, are subject to high price elasticity. A fall in the purchasing power of retail consumers, for any reason whatsoever, including rising consumer inflation and a slowdown in economic growth will have an adverse impact on our customer's revenues and profitability. A decline in the revenues or the profitability of our customers could result in such customers reducing their dependence on temperature controlled logistics service providers which could adversely impact the temperature controlled logistics industry and, consequently, may affect our revenues.

26. ***Delays or defaults in client payment could result in reduction of our profits.***

One of the risks involved in relation to our business is the practice of extending credit for long periods of time and the uncertainty regarding the receipt of outstanding amounts. Due to these industry conditions, we have and will continue to have high levels of outstanding receivables. In Fiscal 2013 and in Fiscal 2014, we had ₹256.35 million and ₹394.77 million, respectively, worth of trade receivables i.e., 22.47% and 25.43%, respectively of our total revenues. If the delays or defaults in client payments continue or increase in proportion to our total revenues, it will result in a reduction of our profits. Further, while we may exercise a lien over the products warehoused, in the event of a non-payment of dues, there can be no assurance that we will be able to successfully sell the products to recover our dues in part or full.

27. ***The interests of our Directors may cause conflicts of interest in the ordinary course of our business.***

Conflicts may arise in the ordinary course of decision making by our Board. Some of our Non-Executive Directors are also on the board of directors of certain companies engaged in businesses similar to our business. There can be no assurance that our Directors will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future. If any of our Directors are faced with a conflict of interest, they may choose to favour the business competing with our Company. This may affect our business, growth prospects and our financial condition.

28. ***We avail certain tax benefits which may not be available to us in the future. Loss of these tax benefits may result in a decrease in our margins. Taxes and other levies imposed by the Central or State Governments, as well as other financial policies and regulations, may have an adverse effect on our business, results of operations and financial condition.***

We are subject to taxes and other levies imposed by the Central or State Governments, including customs duties, excise duties, central sales tax, service tax, income tax, value added tax, local body taxes and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax schemes in India are subject to change from time to time. Any adverse changes in any of the taxes levied by the Central or State Governments may adversely affect our competitive position and results of operations. Further, we cannot assure you that certain tax incentives, that we currently avail, will continue to be available in the future. Illustratively, subject to the fulfilment of prescribed conditions, our Company is entitled to claim deduction under Sec 35AD of Income Tax Act, 1961. The said tax benefit entitles us to a deduction of capital expenditure. Up to AY 2012 – 2013, we were entitled to a 100% deduction which has been increased to 150% deduction from AY 2013-2014, incurred wholly and exclusively for the purpose of setting up and operating cold chain facilities. Our Company is eligible for the said deductions for temperature controlled warehouses set up after the date from which this deduction is applicable. Changes in, or elimination of, tax incentives may adversely affect our financial condition and results of operations. Further, any withdrawal or reduction or other adverse modification in the income tax regime could have an adverse impact on our business, financial condition and results of operations.

29. ***If we cannot respond effectively to competition, our financial condition may be adversely affected.***

The temperature controlled logistics sector is fragmented with various regional and / or unorganised service providers, consequent to which we face intense competition. It is estimated that over 90% of the temperature controlled logistics warehousing and around 80% of temperature controlled distribution is catered to by regional and / or unorganised service providers. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] These operators may also have a significant pricing advantage since the scale of their operations would, generally, be smaller. In addition, while the cost of setting-up wide-ranging temperature controlled operations may be significant, the cost of

setting-up basic level cold storage facilities is low and the approvals and clearances required are not prohibitive. Consequently, the entry barriers for regional and / or unorganised service providers are not significant.

At present, over 64% of the cold storages are currently located in Uttar Pradesh and West Bengal with further 16% located in Punjab, Gujarat and Bihar [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*], where we do not have a significant presence. The presence of several cold storages in the northern states may hamper our ability to grow in these markets. Further, if the operators in such markets penetrate locations where we have a significant presence, we may face additional competition which may have an adverse impact on our revenue and profitability.

The Indian temperature controlled logistics industry is still in its nascent stages. If transnational operators set up their business in India or any major multi-brand distributors opt to set up their own temperature controlled warehousing and distribution services, we may not be able to effectively compete with the scale of their operations and could face significant pressure on our margins. If we are unable to effectively respond to competition from existing players and /or new entrants, and consequent pricing pressures, it will adversely affect our business, financial condition and results of operations.

30. ***Our inability to deliver products in a timely manner may affect our reputation and business prospects.***

Time is of the essence in our business. Our operations are dependent upon timely pick-up and delivery of products that are stored in our temperature controlled warehouses or that are distributed by us. However, distribution of such products may be subject to delays including due to factors beyond the control of our Company. Any delay in the delivery of products may result in breach of the contract with our customers and may be ground for termination of our agreements. An inability to retain our customers may harm our reputation and will have an adverse impact on our financial performance and business prospects.

Further, a delay in the distribution of temperature sensitive products may compromise the integrity and quality of the product and could render us susceptible to litigation from our customer and to potential claims from the end consumer of such products. While, thus far, no proceedings have been initiated against us in this regard, there can be no assurance that we will not face such risks in future or that we will not be subject to litigation.

31. ***Conflicts of interest may arise out of common business objects shared by our Company and certain of our Group Companies. There can be no assurance that such Group Entities will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours.***

Some of our Group Companies could offer services that are related to our business, which could lead to potential conflicts of interest. The memorandum of association of each of these entities entitles each of them to undertake and carry out businesses that are similar or related to our business. Although we have not faced competition from or had any conflicting interests with our Group Companies thus far, there can be no assurance that our Group Companies will not provide comparable services, expand their presence or acquire interests in competing ventures in the locations in which we operate. As a result, a conflict of interest may occur between our business and the business of our Group Companies which could have an adverse effect on our operations.

Further, there may be conflicts of interest in addressing business opportunities and strategies where other companies in which our Promoter, our Promoter Group and Group Companies have equity interests are also involved. In addition, new business opportunities may be directed to these affiliated companies instead of us leading to loss of our business and revenues.

32. ***We may be held liable for the payment of wages to the contract labourers we engage in our transportation business and for civil works.***

In order to retain flexibility and control costs, our Company appoints independent contractors who, in turn, engage on-site contract labour for performance of our civil works and for our transportation business. As on March 31, 2014, 1,107 workers constituting 74.30% of our total workforce were engaged by us on contract labour basis. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. If we are required to pay the wages of the contracted employees, our results of operations and financial condition could be adversely affected. In addition,

under the Contract Labour (Regulation and Abolition) Act, 1970, we may be required to absorb a number of such contract labourers as permanent employees if certain prescribed criteria are met. Further, any order from a regulatory body or court directing us to absorb our contracted employees could have an adverse effect on our business, results of operations and financial condition.

Further, we could be held liable for the acts committed by, or omission on the part of, personnel engaged by us on contract labour basis.

33. ***Our Promoter will continue to hold a significant equity stake in our Company after the Issue which affect our ability to raise further capital.***

Following completion of the Issue, our Promoter will continue to hold 40.17% of our equity share capital (assuming (a) the Issue is fully subscribed and (b) outstanding stock options are fully converted). GDL, will, therefore, have the ability to significantly influence our operations. This will include the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings including issue of Equity Shares, payment of dividends, determining business plans, mergers and acquisitions strategy. Further, if, in future, our Promoter is unwilling to dilute its equity stake in our Company and does not, or is unable to, fund us, our growth may be affected. In addition, the trading price of the Equity Shares could be materially adversely affected if potential new investors are disinclined to invest in us because they perceive disadvantages to a large shareholding being concentrated in our Promoter. For details of stake in our Company held by our Promoter, please see the chapter entitled 'Capital Structure' on page 60 of this Red Herring Prospectus.

34. ***We may raise additional equity capital which may dilute your existing shareholding.***

Our growth and business strategies may require us to raise additional capital. We have, in July, 2013, raised ₹600 million through an issue of Equity Shares to Norwest Venture Partners VII-A Mauritius (NVP) and in the past we have raised equity capital from the International Finance Corporation (IFC). In future, we may meet additional capital requirements through a further issue of securities. Any issuance of Equity Shares to persons other than the Equity Shareholders will dilute your existing equity shareholding. Further, we may obtain funding from our Promoter through an equity infusion. This will also dilute your shareholding.

35. ***Our operations are subject to varied business risks and our insurance cover may prove inadequate to cover our economic losses.***

Our operations are subject to various risks and hazards which may adversely affect revenue generation and profitability. While we believe that we have taken adequate safeguards to protect our assets from various risks inherent, including by purchasing and maintaining relevant insurance cover, it is possible that our insurance cover may not provide adequate coverage in certain circumstances.

We maintain All Risk insurance for each of our properties including cover for fire, flood and earthquake. While we believe that we are sufficiently covered, certain types of losses may be either uninsurable or not economically insurable, such as losses due to acts of terrorism or war. Should an uninsured loss occur, we could lose our investment in, as well as anticipated profits and cash flow from, such a property. In addition, even if any such loss is insured, there may be a significant deductible on any claim for recovery prior to our insurer being obligated to reimburse us for the loss, or the amount of the loss may exceed our coverage for the loss. Further, even in the case of an insured risk occurring there can be no assurance that we will be successful in claiming insurance in part or full, or the insurance purchased by us may be insufficient to cover the loss occasioned by the risk. Any loss that is not covered by insurance or for which we are unable to successfully claim insurance or which is in excess of the insurance cover could, in addition to damaging our reputation, have an adverse effect on our business, financial condition and results of operation. Further, an insurance claim once made could lead to an increase in our insurance premium.

36. ***Contingent liabilities that have not been provided for could adversely affect our financial condition.***

As of March 31, 2014, we had certain contingent liabilities that had not been provided for in our restated financial information. The details of such contingent liabilities are as follows:

Particulars	As of March 31, 2014 (in ₹ million)
Bank Guarantees	7.72

Sales Tax Matters	1.26
Income Tax Matters	0.77
Wealth Tax Matters	0.30

37. ***Our management will have significant flexibility in temporarily investing the Net Proceeds of the Issue.***

We intend to use the Net Proceeds of the Issue for capital expenditure and long term working capital. For further details, please see the chapter entitled ‘*Objects of the Issue*’ on page 79 of this Red Herring Prospectus. Pending such utilisation of the Net Proceeds of the Issue, we have significant flexibility to temporarily invest such Net Proceeds of the Issue in accordance with the policies established by the Board. Our management may also determine that it is appropriate to revise our estimated expenditure, fund requirements and deployment schedule for various reasons including revision in cost estimates, exchange rate fluctuations and external factors, which may not be within the control of our management but may affect the use of Net Proceeds.

38. ***We may be unable to enforce our rights under some of our agreements with our customers on account of insufficient stamping and non-registration.***

We enter into agreements with our customers for our warehousing and transportation business. The terms, tenure and the nature of the agreement may vary depending amongst others on the product and the customer. Some of the agreements executed by us may be inadequately stamped. Inadequately stamped documents while not illegal cannot be enforced in a court of law until the applicable stamp duty, with penalty, has been paid and could impact our ability to timely enforce our rights under the agreements.

Further, some of our customers are walk-in customers with whom we do not execute definitive agreements. The arrangement with such customers is through a simple invoice. There can be no assurance that we will be able to enforce our rights under these arrangements.

39. ***We could be adversely affected by instances of “bird” flu, or other food-borne illness, as well as widespread negative publicity regarding food quality, illness, injury or other health concerns.***

Negative publicity, real or perceived, about food quality, illness, injury or other health concerns (including from life-style diseases) or similar issues stemming from food products we warehouse or distribute could materially adversely affect us, regardless of whether they pertain to our own temperature controlled warehouse or those operated by others. For example, health concerns about the consumption of meat products or specific events such as the outbreak of “bird” flu could lead to changes in consumer preferences, thereby impacting the business of our customers resulting in loss of business to us. In addition, we cannot guarantee that our operational controls and employee training will be effective in preventing food-borne illnesses, food tampering and other food safety issues that may affect our operations. Food-borne illness or food tampering incidents could be caused by customers, employees or food suppliers and transporters and, therefore, could be outside of our control.

40. ***We have experienced negative cash flows during previous fiscals and any negative cash flows in the future could adversely affect our financial condition and trading price of our Equity Shares.***

As per our restated financial information, we have experienced negative cash flows from investing and financing activities in previous fiscals. The negative cash flow from investing and financing activities incurred in the previous Fiscals are as set forth in the table below:

(in ₹ millions)

Particulars	For the year ended March 31				
	2014	2013	2012	2011	2010
Net Cash generated from operating activities	146.66	139.61	109.90	100.92	18.95

Net Cash generated from (used in) investing activities	(1,164.37)	(1,133.83)	(262.19)	(247.44)	(64.15)
Net Cash generated from (used in) financing activities	1,105.35	926.97	(0.29)	(0.06)	237.65
<b>Net increase/(decrease) in cash and cash equivalents</b>	<b>87.64</b>	<b>(67.25)</b>	<b>(152.58)</b>	<b>(146.58)</b>	<b>192.45</b>

Any negative cash flows in future could adversely affect our financial condition and the trading prices of the Equity Shares.

41. ***Gateway Distriparks (Kerala) Limited and Chandra CFS and Terminal Operators Private Limited, our Group Companies have incurred losses in the previous three years.***

Gateway Distriparks (Kerala) Limited and Chandra CFS and Terminal Operators Private Limited, our Group Companies have incurred losses in the past three years. Gateway Distriparks (Kerala) Limited has incurred losses of ₹0.04 million, ₹0.86 million and ₹9.93 million in Fiscal 2012, Fiscal 2013 and Fiscal 2014, respectively. Chandra CFS and Terminal Operators Private Limited have incurred losses of ₹14.72 million, ₹13.37 million and ₹0.68 million in Fiscal 2012, Fiscal 2013 and Fiscal 2014, respectively.

42. ***Our Company's restated financial information, contained restatement adjustments as a result of certain audit qualifications that were made in the auditor's report of our previous statutory auditors in respect of the audited financial statements of our Company for the Fiscal 2009.***

Our Company's audited financial statements contained specific qualifications in the auditor's report issued by previous statutory auditors for the Fiscal 2009 with regard to (i) excess managerial remuneration paid to the Manager of our Company, (ii) provision of loss on consignment business pending reconciliation with consignment parties, (iii) provision for doubtful debts pending reconciliation / confirmation from parties and (iv) non provision of doubtful balances recoverable in respect of expenses incurred on a pilot project.

All of these qualifications were appropriately addressed / adjusted in the respective fiscals as a part of the restated financial information of our Company.

For further details please see the chapter entitled 'Financial Statements of our Company' on page 180 of this Red Herring Prospectus.

43. ***We have issued Equity Shares in the last one year at a price which may be lower than the Issue Price.***

We have issued Equity Shares in the last 12 months, under our Company's employee stock option scheme, which may be at a price lower than the Issue Price. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

44. ***Some of the forms filed by us with the Registrar of Companies and our records in that respect are not traceable.***

We have been unable to locate corporate records of our Company prior of to the acquisition of majority stake by our Promoter, in respect of the allotment of 49,293 shares to Amalgam Investment Private Limited on July 13, 1995 and the increase in authorised capital from ₹5.00 million to ₹30.00 million on June 30, 1995. We cannot assure you that these records will be available in the future or that we will not be subject to any penalty imposed by the competent regulatory authority in this respect.

#### **External Risks**

45. ***Political instability or changes in the Indian central government could adversely affect economic conditions in India and consequently, our business.***

Our Company is incorporated in India and currently derives all of its revenues from operations in India and all of its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. The current government has announced that its general intention is to continue India's current economic and financial sector liberalisation and deregulation policies. However, there can be no assurance that such policies will be continued, and a significant change in the government's policies could affect business and economic conditions in India, and could also adversely affect our financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the power generation and power generation equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

46. ***Hostilities, terrorist attacks, civil unrest, breaches of law and order and other acts of violence may adversely affect our business and the trading price of the Equity Shares.***

Terrorist attacks, civil unrest and other acts of violence or war within India and the surrounding region may adversely affect worldwide financial markets and may result in a loss of consumer confidence, which in turn may adversely affect our business, prospects, results of operations, cash flows and financial condition.

47. ***Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, with which investors may be more familiar.***

We have not attempted to explain in a qualitative manner the impact of the IFRS or U.S. GAAP on the financial information included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial information to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. Indian GAAP differs from accounting principles with which prospective investors may be familiar in other countries. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices, Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices, Indian GAAP, the Companies Act and the SEBI ICDR Regulations, on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

48. ***Public companies in India, including our Company, may be required to prepare financial statements under IFRS or a variation thereof, IndAS. The transition to IndAS in India is still unclear and we may be negatively affected by such transition.***

Our Company currently prepares its annual and interim financial statements under Indian GAAP.

Public companies in India, including our Company, may be required to prepare annual and interim financial statements under Indian Accounting Standard 101 "First-time adoption of Indian Accounting Standards" (IndAs). Recently, the ICAI has released a near-final version of the IndAS. The Ministry of Corporate Affairs of the Government, on February 25, 2011, has announced that IndAS will be implemented in a phased manner and the date of such implementation will be notified at a later date. As at the date of this Red Herring Prospectus, the MCA has not yet notified the date of implementation of IndAS. There is not yet a significant body of established practice on which to draw in forming judgments regarding its implementation and application. Additionally, IndAS has fundamental differences with IFRS and therefore financial statements prepared under IndAS may be substantially different from financial statements prepared under IFRS. There can be no assurance that our financial condition, results of operations, cash flow or changes in shareholders' equity will not appear materially different under IndAS than under Indian GAAP or IFRS. As we adopt IndAS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. There can be no assurance that our adoption of IndAS will not adversely affect our reported results of operations or financial condition and any failure to successfully adopt IndAS in accordance with the prescribed timelines may have a material adverse effect on our financial position and results of operations.

49. ***Our business and activities may be regulated by the Competition Act, 2002 and proceedings may be enforced against our Company consequently affecting our business, cash flows and financial condition.***

The Competition Act, 2002 (**Competition Act**) seeks to prevent business practices that have a material adverse effect on competition in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause a material adverse effect on competition in India is void and attracts substantial monetary penalties. Any agreement that directly or indirectly determines purchase or sale prices, limits or controls production, shares the market by way of geographical area, market, or number of customers in the market is presumed to have a material adverse effect on competition. Provisions of the Competition Act relating to the regulation of certain acquisitions, mergers or amalgamations which have a material adverse effect on competition and regulations with respect to notification requirements for such combinations came into force on June 1, 2011. The effect of the Competition Act on the business environment in India is unclear. If we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the Competition Commission of India, or any adverse publicity that may be generated due to scrutiny or prosecution by the Competition Commission of India, it may have a material adverse effect on our business, prospects, results of operations, cash flows and financial condition.

50. ***Investors may be adversely affected due to retrospective tax law changes by the Indian government affecting our Company.***

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term “substantially” has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively, there cannot be an assurance that such retrospective changes will not happen again.

51. ***Our Company’s ability to raise foreign capital may be constrained by Indian law.***

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our Company’s financing sources for ongoing expansion plans or acquisitions and other strategic transactions, and hence could constrain its ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure investors that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have a material adverse effect on our Company’s business, prospects, result of operations, cash flows and financial condition.

52. ***Any downgrading of India’s debt rating by a domestic or international rating agency could have a negative impact on our business.***

India’s sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, which are outside our control. Any adverse revisions to India’s credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

53. ***Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

The Articles of Association and Indian law govern the corporate affairs of our Company. Legal principles relating to these matters and the validity of corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those applicable to a company in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders of our Company than as shareholders of a company in another jurisdiction.

54. ***We may require further equity issuances to satisfy our capital needs, which we may not be able to***

***procure.***

We may need to raise additional capital from time to time, dependent on business requirements. Some of the factors that may require us to raise additional capital include (i) business growth beyond what the current balance sheet can sustain, (ii) additional capital requirements imposed due to changes in regulatory regime or new guidelines, and (iii) significant depletion in our existing capital base due to unusual operating losses. We may not be able to raise such additional capital at the time it is needed or on terms and conditions favourable to us or to the existing shareholders.

**55. *Changing laws, rules and regulations and legal uncertainties may adversely affect our business and financial performance.***

Our business and operations are governed by various laws and regulations. Our business and financial performance could be adversely affected by any change in laws or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business.

There can be no assurance that the relevant governmental authorities will not implement new regulations and policies which will require us to obtain additional approvals and licenses from the government and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on our business, financial condition and results of operations.

For instance, the Companies Act, 2013 has recently been passed by the Indian Parliament and has received assent of the President of India. Certain sections of the Companies Act, 2013, have been notified and the corresponding sections of the Companies Act, 1956 have ceased to have effect from the date of notification of such sections of the Companies Act, 2013. Whilst the Companies Act, 2013 is not yet fully operational, it envisages significant changes to the Indian company law framework, including the issue of capital by companies, corporate governance, audit matters and corporate social responsibility, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Various provisions of the Companies Act, 2013, are subject to further directions to be issued by the GoI. In particular, we will be required to amend our memorandum of association and articles of association in order to comply with the Companies Act 2013. We have not yet determined other significant impact of this legislation on our business.

**56. *You will not be able to immediately sell any of our Equity Shares purchased through this Issue on Stock Exchanges until the receipt of appropriate trading approvals from Stock Exchanges.***

Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the stipulated time period. Any failure or delay in obtaining the approvals would restrict your ability to dispose of your Equity Shares.

**57. *Inflation in India may adversely affect our business.***

India has experienced in the past and is currently experiencing high rates of inflation. We can provide no assurance that high rates of inflation will not continue or even increase in the future, which could have an effect on the demand for natural gas and our ability to sell those products. In addition, from time to time, the Government of India has taken measures to control inflation, which have included tightening monetary policy by raising interest rates, restricting the availability of credit and inhibiting economic growth. Inflation, measures to combat inflation and public speculation about possible governmental actions to combat inflation have also contributed significantly to economic uncertainty in India and heightened volatility in the Indian capital markets. Periods of higher inflation may also slow the growth rate of the Indian economy which could also lead to a reduction in demand for natural gas and a decrease in our sales thereof. Inflation may also increase some of our costs and expenses. Moreover, the reporting currency of our financial statements is the Indian Rupee, and fluctuations in the value of the Indian Rupee that result from inflation, could affect our results of operations and financial condition. To the extent demand for our products decreases or our costs and expenses increase and we are not able to pass those increases in costs and expenses on to our customers, our operating margins and operating income may be adversely affected, which could have a material adverse effect

on our business, financial condition and results of operations.

### **Risks Relating to the Issue**

58. ***Any future issuance of Equity Shares may dilute your shareholding and sales of the Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares.***

Any future equity issuances by our Company, including a primary offering or ESOPs, may lead to the dilution of investors' shareholdings in it. Any future equity issuances by our Company or sales of the Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for our Company, including difficulty in raising debt financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of the Equity Shares.

59. ***We cannot assure payment of dividends on the Equity Shares in the future.***

While our dividend policy is as set out in the chapter entitled 'Dividend Policy' on page 179 of this Red Herring Prospectus, the amount of future dividend payments by our Company, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. Our Company may decide to retain all of its earnings to finance the development and expansion of its business and therefore, we may not declare dividends on the Equity Shares. Additionally, we may, in the future, be restricted by the terms of our loan agreements to make any dividend payments unless otherwise agreed with the lenders.

60. ***After the Issue, the price of our Equity Shares may become highly volatile, or an active trading market for our Equity Shares may not develop.***

The price of our Equity Shares on the Stock Exchanges may fluctuate after the Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance or those of GDL; performance of our competitors; adverse media reports about us or the Indian logistics sector generally; changes in the estimates of our or GDL, performance or recommendations by financial analysts; changes to the market price of the listed shares of GDL; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal regulations. There has been no public market for the Equity Shares of our Company and the price of the Equity Shares may fluctuate after the Issue.

If the stock price of the Equity Shares fluctuates after the Issue, investors could lose a significant part of their investment. As at the date of this Red Herring Prospectus, there is no market for the Equity Shares. Following the Issue, the Equity Shares are expected to trade on the NSE and BSE. There can be no assurance that active trading in the Equity Shares will develop after the Issue or, if such trading develops, that it will continue. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares.

61. ***Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months as a capital asset will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long-term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided for under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

62. ***The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.***

The initial public offering price will be determined by the Book Building Process and may not be indicative of prices that will prevail in the open market following the Issue. The market price of the

Equity Shares may be influenced by many factors, some of which are beyond our control, including:

- the failure of security analysts to cover the Equity Shares after this Issue, or changes in the estimates of our performance by analysts;
- the activities of competitors and suppliers;
- future sales of the Equity Shares by our Company or our shareholders;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- developments affecting fiscal, industrial or environmental regulations;
- the public's reaction to our press releases and adverse media reports; and
- general economic conditions.

As a result of these factors, investors may not be able to resell their Equity Shares at or above the initial public offering price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. There can be no assurance that the investor will be able to resell their Equity Shares at or above the Issue Price.

63. ***There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect investors' ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Subsequent to listing, the Equity Shares will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India, which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the stock exchanges based on historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform us of the percentage limit of the circuit breaker and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of investors to sell Equity Shares or the price at which investors may be able to sell their Equity Shares.

64. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely affect the market price of the Equity Shares.***

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities. Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are permitted (subject to certain exceptions) if they comply with, among other things, the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares does not comply with such pricing guidelines or reporting requirements, or falls under any of the exceptions referred to above, then prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate any such foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular term or at all.

65. ***Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our financial results.***

The Equity Shares will be quoted in Rupees on the BSE and the NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares,

may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

66. ***Investors may have difficulty enforcing foreign judgments against our Company or our management.***

Our Company is a limited liability company incorporated under the laws of India. 6 (six) of our 8 (eight) Directors and certain executive officers are residents of India. A substantial portion of our Company's assets and the assets of our Directors and executive officers resident in India are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against our Company or such parties outside India.

Section 44A of the Civil Procedure Code, provides that where a foreign judgment has been rendered by a court in any country or territory outside India, which the Government of India has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. The United Kingdom has been declared by the Government of India to be a reciprocating territory for the purposes of section 44A. However, the United States has not been declared by the Government of India to be a reciprocating territory for the purposes of section 44A. A judgment of a court in the United States may be enforced in India only by a suit upon the judgment, subject to section 13 of the Civil Procedure Code and not by proceedings in execution. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. Generally, there are considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amount recovered.

## SECTION III: INTRODUCTION

### SUMMARY OF INDUSTRY

The following is a summary of the industry overview. This summary should be read in conjunction with, and is qualified in its entirety by, more detailed information in the chapter entitled ‘*Industry Overview*’ on page 108 of this Red Herring Prospectus.

*We have relied on websites and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Issue has independently verified the information provided in this chapter. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.*

#### Indian Economy

India, one of the most populous countries in the world with an estimated population of 1.2 billion; i.e. approximately 17% of the total global population, is also one of the largest economies on a purchasing power parity basis with a GDP of approximately USD 1.9 trillion.

In 1991, the Government of India, with a view to promote economic stability and growth, adopted a series of comprehensive macroeconomic and structural reforms focused on deregulation of industry, accelerating foreign investment and implementing a privatization program for disinvestment in public sector units. Consequent to the reforms, India’s economy registered robust growth over the last decade. The following table illustrates India’s real GDP growth between Fiscals 2009 and 2013 (at factor cost at constant 2004-05 prices):

Fiscal 2009	Fiscal 2010	Fiscal 2011	Fiscal 2012	Fiscal 2013
6.72%	8.59%	9.32%	6.21%	4.96%

Source: <http://mospi.nic.in> “Summary of macroeconomic aggregates at constant (2004-05) prices, 1950-51 to 2012-13”

The Indian GDP is expected to grow at around 6% in Fiscal 2015, compared to a growth of 4.8% in Fiscal 2014.

India is expected to become the world’s fifth largest consumer market by 2025 from its twelfth position in 2010. The key drivers for the growth in consumption are expected to be:

- *Higher affordability:* The rapid growth in the size of India’s middle income and high income group is expected to result in doubling of the Indian household consumption by 2015.
- *Greater consumer acceptance:* Greater consumer acceptance of newer products driven by factors such as a younger population, faster urbanization, increase in the number of working women and lifestyle changes, along with other socio-economic factors is expected to result in a transition of the consumption pattern of the Indian consumer. Further, the growing international exposure among Indians has led to awareness of international cuisines resulting in increased acceptance and demand for such products.
- *Greater availability:* Deeper penetration, particularly of FMCG products, spurred by better distribution channels, coupled with spread of organized retail has increased availability manifold.
- *Greater awareness:* Greater media reach and penetration has, amongst others, resulted in a more aware and discerning consumer. Pertinently, this phenomenon is also no longer restricted to urban areas.

#### Temperature Controlled Logistics Industry

Temperature Controlled Logistics (TCL) refers to the series of links in the logistics chain of perishable products. TCL is responsible for preserving the quality to enable their availability during an off-season or making them available at locations far from the production/ processing locations. TCL comprises:

- *Warehousing:* Warehousing temperature sensitive products in custom built temperature controlled warehouses. The temperature controlled warehouse generally consists of several temperature zones capable of warehousing goods in the range of -25°C to +20°C.
- *Distribution:* Distribution entails primary and secondary transportation of temperature sensitive products from source to stores using temperature controlled containerized trucks and cargo trains. Certain containerized trucks are also modified to enable installation of temperature controlled zones.

Businesses which utilize cold chains in India include dairy, poultry and meat, seafood, ready-to-eat, chocolates, healthcare and pharmaceuticals, industrial products and fruit and vegetables.

India's temperature controlled logistics industry is estimated at ₹120,000 – ₹150,000 million and is poised to grow at 15% to 20%, year on year, for the next 3 to 5 years. The growth is expected to be driven *inter alia* by:

- An increase in the consumption of temperature sensitive perishables;
- Greater use of temperature controlled logistics in categories such as pharmaceuticals and fruits and vegetables; and
- An increase in the consumption of a gamut of niche and high end products that need to be maintained in temperature controlled environment.

Changing lifestyles and resultant consumer preferences for processed foods, off-season and exotic / high end fruits and vegetables and increased incidence of eating out (at quick service or other restaurants) is expected to drive the use of temperature controlled logistics. The spurt in growth is also expected to be fuelled by demand from Tier 2 and Tier 3 cities, in addition to the Tier I cities.

#### **Current state of the Indian TCL industry**

India falls under the category of low cold chain adoption countries i.e. countries with less than 10% of produce passing through a cold chain, reflecting a significant potential for growth.

Further, TCL providers in India are largely fragmented and generally focus on a single region or one aspect of the logistics chain such as storage or transportation. Consequently, there are very few integrated temperature controlled logistics service providers, and in particular, integrated service providers with the ability to service customers on a pan-India basis.

It is generally estimated that the current share of organized players is only around 6%-7% in the temperature controlled warehousing segment and 15-20% in the temperature controlled transportation; consequently, the potential for growth in organized services is immense. As against an overall market growth of around 15%, organized outsourced temperature controlled services are expected to grow at around 20% p.a.

In terms of volume, the existing capacity is estimated to be around 30 million MT of temperature controlled warehousing and around 7,000-8,000 Reefer Vehicles.

Of the existing cold warehousing capacity, 75% is dedicated to potatoes while 23% is classified as 'Multipurpose' i.e. catering to multiple commodities across dairy products, frozen foods, fruits and vegetables and the balance 2% is used across meat and seafood.

#### **Prominent characteristics of the TCL industry**

*High capital and operating expenditure:* Maintaining the required controlled conditions in terms of temperature, humidity, air flow etc. necessitates investment in appropriate refrigeration and insulation equipment which makes the cold chain business capital intensive. Continuous operation of the cold store / refrigeration unit to avoid thermal shock also leads to high power consumption making profitability sensitive to power costs.

*Seasonality of Demand:* especially in the case of fruit and vegetables makes the cold chain business susceptible to seasonal variations. However, catering to commodities with complementary seasonality helps to avoid fluctuation in utilizations.

*Technical nature:* Provision of quality and reliable cold chain services necessarily requires an understanding of the specific requirements of perishables; for instance, apart from the temperature and humidity requirements of specific fruits, one needs to be aware of the ‘breathing’ (Air flow) requirement, moisture retention etc. Lack of this knowledge can lead to multiple issues that reduce or eliminate the value of a product.

The key trends shaping the industry include:

- Deeper penetration of high technology controlled atmosphere warehousing that enables significant increase in extendibility of the life of fruits;
- Increasing involvement of cold chain service providers in trading of fruits and vegetables to tie-up capacity utilization; and
- The industry enjoys increasing support from the government in the form of multiple policies and incentives to ensure development of requisite infrastructure to avoid waste and inefficiencies on account of lack of the cold chain.

## SUMMARY OF BUSINESS

*The following is a summary of our business. This summary should be read in conjunction with, and is qualified in its entirety by, more detailed information in the chapter entitled 'Our Business' on page 115 of this Red Herring Prospectus.*

### Overview

We commenced our business as a trader of frozen marine products and in Fiscal 1998, we commenced cold storage operations at 4 (four) locations. We have, since then, expanded our operations to become an integrated temperature controlled logistics service provider with an ability to service customers on a pan-India basis.

Our operations can be classified into the following business segments:

1. Temperature controlled services; and
2. Ambient distribution.

While in previous financial years we only operated in the temperature controlled services and ambient distribution business segments, in Fiscal 2014 we commenced ambient warehousing as well.

Our warehousing solutions cover the complete spectrum of temperature ranges from ambient to chilled and frozen (i.e. +20°C to -25°C). We offer blast freezing facilities at our temperature controlled warehouses in Bengaluru, Mevalurkuppam, (near Chennai), Visakhapatnam, Serampore (near Kolkata), Taloja (near Mumbai), Ahmedabad, Palwal (near Delhi), Mubarakpur (near Chandigarh) and Surat. Our integrated 'Source to Stores' operations comprise warehousing, primary distribution and secondary distribution and value-added services including kitting, labelling, sorting and bulk breaking.

As of March 31, 2014, our operations comprised 23 temperature controlled warehouses across 14 locations in India including Serampore (near Kolkata), Taloja (near Mumbai), Palwal (near Delhi), Mevalurkuppam, (near Chennai) and Bengaluru capable of warehousing 58,543 pallets and 3,000 ambient pallets. As of March 31, 2014, we operated 370 Reefer vehicles consisting of 307 leased and 63 owned vehicles. As of March 31, 2014, we engaged a total workforce of 1,490 including 383 permanent employees and 1,107 on a contract labour basis.

A majority of our temperature controlled warehouses are ISO 14001 (TUV-SUD), ISO 22000 (TUV-SUD) and FSSAI certified. In addition, 4 (four) of our temperature controlled warehouses are EIA and MPEDA (Marine Products Export Development Authority) certified and 4 (four) temperature controlled warehouses are certified under the Drugs and Cosmetics Act, 1940.

Our distribution services comprise primary and secondary transportation. The primary transportation (long haul) generally facilitates inter-city transport of products. The primary transport service includes door to door service, customized Milk Runs and Part Cargo Consolidation. We also provide secondary transportation i.e. last mile distribution, supplying, amongst others, QSRs, retail outlets, restaurants and the hotels.

The product segments we cater to include:

- Dairy products including butter and cheese;
- Ice-cream;
- Poultry and meat;
- Sea food;
- Ready-to-eat / ready-to-cook food products;
- Confectioneries including chocolate and baked products;
- Fruits and vegetables;
- Healthcare and pharmaceutical products; and
- Industrial products such as x-ray, and photo-imaging, films.

GDL is our Promoter and our largest shareholder. Our other shareholders include Mitsubishi Corporation, Mitsubishi Logistics Corporation, International Finance Corporation and Norwest Venture Partners VII-A Mauritius.

Our total revenue increased from ₹1,141.03 million in Fiscal 2013 to ₹1,552.33 million in Fiscal 2014. Our net profit as restated also increased from ₹198.79 million in Fiscal 2013 to ₹232.27 million in Fiscal 2014. Our total revenue in Fiscal 2014 comprised ₹1,518.57 million and ₹15.50 million, constituting 97.83% and 1.00%, respectively, from each of temperature controlled services and ambient distribution business.

### ***Competitive Strengths***

We believe that the following are our core competitive strengths:

#### **Pan-India integrated temperature controlled logistics services**

We believe we are one of the largest integrated temperature controlled logistics service providers operating 23 temperature controlled warehouses spread across 14 locations with an ability to service customers on a pan-India basis. We have set-up our temperature controlled warehouses adjacent to cities with a large potential for sourcing and/or consumption of temperature sensitive products including the larger cities such as Mumbai, Chennai, Bengaluru and Kolkata. Our distribution network comprises primary and secondary transportation. As of March 31, 2014, we operated 226 primary transportation vehicles with an ability to cover over 242 cities and towns and 144 secondary transportation vehicles supplying, amongst others, to QSRs, retail outlets, restaurants and hotels within a city. Our integrated operations enable us to maintain the temperature integrity of the customers' products from the point of origin to the consumption point, which is critical for product quality.

#### **Domain Knowledge and technological advantage**

We believe that our experience in setting-up and operating temperature controlled warehouses across different geographic locations in India enables us to better conceptualise and execute the construction of such warehouses.

In addition, we believe that the technology used in our operations is state-of-the-art and we have customised it to suit our operational requirements based on our experience and understanding of our customers' requirements. Our warehousing infrastructure comprises advanced equipment handling and racking system. Further, we use software systems such as warehouse management systems and enterprise resource planning (**ERP**). We employ a real time data logging system that enables us to monitor temperature variations in products both in our temperature controlled warehouses and in a majority of our Reefer Vehicles. In addition, a majority of our Reefer Vehicles are equipped with GPS and GPRS technologies including a few vehicles that are equipped with advanced geo-fencing (i.e., a virtual perimeter for a real-world geographic area) capabilities. These technologies enable us to monitor the progress of our Reefer Vehicles. Further, measures such as palletisation of our storage capacity have enhanced our ability to maintain the quality of the products by stacking products in a manner which enables us to employ more efficient inventory management systems such as first-expiry-first-out (**FEFO**) and first-in-first-out (**FIFO**). We are also members of global industry associations such as Global Cold Chain Alliance (**GCCA**), International Association of Refrigerated Warehouses (**IARW**) and World Food Logistics Organisation (**WFLO**), which enable us to keep abreast with the global developments in the temperature controlled logistics industry in addition to providing us with networking opportunities.

#### **Ability to attract competing brands**

We believe that one of the key factors of success in the temperature controlled logistics business in India is brand neutrality i.e. catering to customers who compete with each other in their respective business segments. We have, over the years, warehoused and distributed various products belonging to entities that are business competitors. Illustratively, we warehouse and distribute products for 4 (four) companies engaged in the business of ice-cream. In India's extremely competitive FMCG segment, the ability to rely on the service provider is critical. The inventory and the specific products managed by us are proprietary to each customer and disclosure of these details could have a significant impact on the performance of the product.

We believe that our continuing ability to service customers who compete with each other in business segments is a testament to our brand neutrality and the confidence reposed in us.

## **Management expertise**

We believe that we have a strong management team led by persons with significant experience in the logistics industry. Our Board comprises Directors who have extensive experience in the setting up and managing companies in the logistics sector. In addition, we also have a management team of qualified professionals, who have expertise and experience in the temperature controlled logistics sector. Our management team comprises skilled and capable professionals who assist the Board in identifying new opportunities and in implementing our business strategies. For further details please see the chapter entitled '*Our Management*' on page 148 of this Red Herring Prospectus.

## **Focus on quality**

Of our 23 temperature controlled warehouses 22 are ISO 22000 certified temperature controlled warehouses, 18 are ISO 14001 certified temperature controlled warehouses and 23 are FSSAI certified temperature controlled warehouses. We adhere to strict guidelines while managing our inventory. We employ a matrix which enables us to identify products that are incompatible to be stored together. Illustratively, we do not store vegetarian products with products containing meat ingredients. Further, our modern warehousing infrastructure comprises equipment handling and racking system as well as warehouse management systems and enterprise resource planning (ERP). We employ a real time data logging system that enables us to monitor temperature variations in products constantly irrespective of whether the product is in our temperature controlled warehouse or in our Reefer Vehicles. This ensures that we can address any concerns immediately thereby ensuring that the quality of the product is not compromised.

## **Established Client Base**

We cater to large corporates across various industry sectors such as dairy, ice-creams, chocolates, and poultry and meat, which avail of temperature controlled logistic services. Some of our more prominent customers are Hindustan Unilever Limited, Graviss Foods Private Limited, Novozymes South Asia Private Limited, McCain Foods India Private Limited, West Coast Fine Foods India Private Limited, Amrit Hatcheries Private Limited, Tamil Nadu Co-operative Milk Producers Federation, Shriram Distribution Services Private Limited, Kris Flexipacks Private Limited, Al-Karim Exports Private Limited, Indian Immunologicals Limited, Suguna Food Limited, Karnataka Co-operative Milk Producers' Federation Limited and Ferrero India Private Limited.

Most of our large customers (in terms of revenue and volumes) have remained largely unchanged over the last three years. During Fiscal 2012, Fiscal 2013 and Fiscal 2014, our top twenty customers constituting approximately 2.95%, 1.45% and 1.91% of our total customer base, contributed approximately ₹306.49 million, ₹443.66 million and ₹676.57 million of our total revenues, respectively. We believe that this is recognition of our capabilities and our ability to retain customers.

## **Strong promoter and investor base**

We were incorporated with the objective of providing captive services to our then promoter which was engaged in trading of frozen marine products. Subsequently, with the infusion of capital from Brooke Bond India Limited (as it then was) we expanded the scope of our operations to include other frozen food products. Since establishing integrated operations we were able to garner domestic and foreign investment from established companies such as GDL, our Promoter, and international operators such as Mitsubishi Corporation and Mitsubishi Logistics Corporation.

GDL, our Promoter, one of the largest Indian logistics service providers, operates, directly and through its subsidiaries, container freight stations located at major Indian ports and an inland container terminal. We believe that GDL's experience in the logistics sector, business relationships and financial stability instils confidence in our customers who prefer dependable and established service providers. Further, we leverage the corporate, institutional and banking relationships of GDL for our businesses operations. In addition, we believe that our association with GDL has also enabled us to attract strong financial investors such as IFC and NVP. We believe that we can leverage our association with GDL in augmenting our business.

We believe our strong investor base has, amongst others, been an important factor in establishing our reputation as an integrated solutions provider in an industry surfeit with regional and / or unorganised operators.

## **Business Strategy**

### **Maintaining our position in the temperature controlled logistics service industry**

The size of the Indian temperature controlled logistics industry estimated to be around ₹120,000 – ₹150,000 million, at present, is expected to grow at 15%-20% per annum over the next 5 years with the organised market growing at the higher end of the range. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We believe that as one of the leading temperature controlled logistics service providers, we are strategically placed to benefit from the expected growth in the industry.

Further, the Indian retail industry is expected to increase from an estimated USD 520 billion in 2012 to USD 750-850 billion by 2015. The food and grocery industry constituting 60% is the largest component of the retail industry. The organised retail segment, though, constitutes only 8% of the total Indian retail market. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We are proposing to increase our warehousing capacity and distribution network to enable us to meet the growing demands of the market. Further, given that a vast majority of our customers are the producers / importers of temperature sensitive products, lack of well-equipped storage facilities and transportation facilities limits their ability to stock such products which, consequently, acts as a deterrent against increasing production / import. Enhancing our storage facilities and scaling up our distribution model, we believe, will facilitate an increase in manufacturing / produce / import of temperature sensitive products. In addition to broadening our customer base, we expect to leverage our existing relationships with established customers to garner additional business.

In addition to enhancing our storage capacity, we are also evaluating setting up temperature controlled warehouses in food parks for processing fruits and vegetable. The Ministry of Food Processing Industries, Government of India, has launched the Mega Food Parks Scheme (MFPS), which aims to accelerate the growth of food processing industry in India by facilitating the establishment of a strong food processing infrastructure backed by an efficient supply chain. As of Fiscal 2012, the Government had approved 13 such projects were approved and 15 have been accorded in-principle approval. We believe that we have the capability to set up temperature controlled warehouses in food parks which we believe will enable us to augment our growth.

### **Augmenting our market share by penetrating markets catered to by regional and / or unorganised operators and in Tier II and Tier III cities**

A vast majority of the temperature controlled logistics service providers are regional and / or unorganised operators. At present, it is estimated that over 90% of the temperature controlled logistics warehousing and around 80% of temperature controlled distribution are catered to by regional and / or unorganised operators who have neither the requisite facilities nor the technical skills to be able to offer complete logistics solutions. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] With increasing consumer awareness, higher standards of living and heightened concerns regarding hygiene, we expect the demand for quality food products to increase. Further, we believe that increasingly strict food safety norms coupled with increasing consumer awareness will prompt entities in the consumer foods business to move towards established temperature controlled service providers. We believe that our ability to handle temperature sensitive products, technical skills and adherence to food safety standards will enable us to penetrate markets catered to by regional and unorganised operators.

At present, we have the ability to service customers on a pan-India basis with temperature controlled warehousing operations near a few prominent cities such as Mumbai, Chennai, Bengaluru and Kolkata. However, over the last decade the demand for quality food products has increased and consumer spending in Tier II and Tier III cities has been steadily on the rise, and this trend is expected to continue. For instance, it is expected that growth in the QSR segment (expected to grow at a rate of 30% per annum) will be particularly prominent in Tier II and Tier III cities. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We believe that Tier II and Tier III cities present significant growth opportunities to our customers and, consequently, us. Expanding our operations into cities such as Baramati, Surat and Bhubaneswar will widen our reach and attract potential customers who are either operating or proposing to venture into nascent markets. We believe that our expanded warehousing operations coupled with the standard and quality of service we offer will augment our growth.

### **Increasing our revenue share from value added services**

We believe that, apart from expanding our reach to new customers, one of the critical means of increasing our margins is to enhance the range of services that we offer to our existing customers. We propose to increase our revenues from our existing value added services (VAS) such as kitting, labelling and sorting. Further, we attempt to evaluate our customers' needs on a regular basis which enables us to customise our service offerings.

In Fiscal 2014, VAS contributed 1.05% and 5.20% to our revenue and profits respectively. Consequently the revenue earned from these services increased by 109.15% for the same period. While the revenue generated from VAS is not significant, it is an important component of our business operations since the cost involved in providing VAS is negligible.

The key criterion in providing value added services is the availability of floor space. One of the main objects of this Issue is to set-up new temperature controlled warehouses which, when complete, will increase the available floor space significantly. We believe the additional floor space we will gain from expansion will boost our ability to provide value added services to our customers.

Further, we propose to provide additional VAS in the fruit and vegetable segment. We are proposing to offer certain other value added services such as pre-cooling, ripening and processing of fruits and vegetables in addition to our already existing services such as cleaning, grading, sorting, cutting and packing of fruits and vegetables. We believe we have the required infrastructure, expertise and available labour force to add these to our service offerings.

### **Increasing our client engagement through vendor consolidation**

Of the total Indian retail market, organized retail constituting 8% is expected to grow at 30%, as against the overall market growth, which is forecasted at 16-18% in the same period. Within the organized retail the food segment is expected to grow at a fast pace of 14-15% on the back of which demand for temperature controlled logistics is expected to increase. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*]. With several MNC's proposing to enter the Indian markets in the organized retail segment, we believe that this business proposition will provide us a comprehensive understanding of purchase planning, consumer preferences, demand and supply, store management and vendor management in the QSR or hospitality segment. This, we believe, would augment our ability to cater to entry level MNC QSRs. We are in negotiations for managing the entire temperature controlled supply chain of certain prominent QSRs. We intend to engage the services of a supply chain management facilitator to provide us critical support.

### **Competition**

The Indian temperature controlled logistics business is largely catered to by regional service providers with approximately 6%-7% in warehousing and 15-20% in transportation catered to by organised operators. Further there are very few organised operators who have a comprehensive pan-India presence. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] In addition, a number of service providers operate only in one or the other sector i.e. either temperature controlled warehouse business or temperature controlled distribution business. Therefore, we compete against various operators in different business segments in different geographic locations in addition to the regional and / or unorganised service providers.

**Illustration of Book Building and Price Discovery Process** *(Investors should note that this example is solely for illustrative purposes and is not specific to the Issue and excludes Anchor Investors.)*

Bidders can bid at any price within the price band. For instance, assume a price band of ₹ 20 to ₹ 24 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the shares of our Company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which our Company is able to issue the desired number of shares is the price at which the book cuts off, *i.e.*, ₹ 22 in the above example. Our Company, in consultation with the book running lead manager, will finalise the issue price at or below such cut-off price, *i.e.*, at or below ₹22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

### Details of the Objects of the Issue

Except for the long term working capital requirement which is proposed to be raised as set out below, the stated objects of the Issue are proposed to be financed entirely out of the Net Proceeds. Accordingly, we confirm that we are not required to make firm arrangements of finance through verifiable means towards 75% of the stated means of finance, excluding the amount to be raised through the Issue. The Net Proceeds, after deduction of all issue expenses, are estimated to be approximately ₹ [•] million.

The fund requirement described below is based on the management estimates and is not appraised by any bank or financial institution. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan and estimates from time to time and consequently our funding requirements and deployment of funds may also change. This may also include rescheduling the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular object vis-à-vis the utilization of Net Proceeds, subject to compliance with applicable law.

Our historical capital expenditure may not be reflective of our future capital expenditure plans. We may have to revise our estimated costs, fund allocation and fund requirements owing to factors such as economic and business conditions, increased competition and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular object at the discretion of our management. The current estimates are based on the quotations received by us and management estimates. As of July 31, 2014, we have not entered

into definitive agreements or placed orders for the purchase of plant and machinery aggregating ₹117.34 million constituting 18.44% of the proposed expenditure in that regard. As some of quotations received are valid up to period mentioned in the respective quotations, we may need to obtain fresh quotation before placing the firm order. Hence the actual cost may vary.

In case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. If surplus funds are unavailable or in case of cost overruns, we expect that the shortfall will be met from internal accruals and/or entering into debt arrangements as required.

Any variation in the objects of the Issue shall be undertaken in accordance with the terms of the Companies Act and the rules framed thereunder.

According to the audited financial statements of our Company, the internal accruals for the year ended March 31, 2013 and March 31, 2014 were ₹139,640,209 and ₹146,645,070, respectively.

In addition, the estimated dates of completion of the warehouses / expected dates of delivery of plant and machinery, as described in this section, are based on management's current expectations and are subject to change due to various factors including those described above, some of which may not be in our control. Accordingly, the net proceeds of the Issue would be used to meet all or any of the uses of the funds described herein.

## 2. Long term working capital

Our business requires working capital and we fund majority of our working capital requirements in the ordinary course of our business from our own funds.

Our business model does not require us to maintain any inventory and, hence, our current assets primarily constitute sundry debtors. Similarly, since we do not maintain any inventory the current liabilities constitute only operational expenses payable.

As of March 31, 2014, our working capital facility consisted of an aggregate fund based limit of ₹ 30 million and an aggregate non-fund based limit of ₹50 million.

\* According to the audited financial statements of our Company, the internal accruals for the year ended March 31, 2013 and Fiscal 2014 were ₹139,640,209 and ₹146,645,070, respectively.

#### Assumptions

##### Trade receivables

Our pallet storage capacity has increased significantly in the recent past. The increase in storage capacity coupled with the highly competitive environment in which our Company operates has necessitated extending increased periods of credit to some of our larger customers. The credit period in sales days has increased from around 70 days to around 81 days, which, we believe, will remain largely unchanged during the current year as well as for the foreseeable future.

##### Trade payables

Our operational expenses are primarily warehouse and vehicles rentals, vehicles running expenses and electricity charges where the payments are generally due within a month. In addition, vehicle fuel expenses which constitute a significant part of our expenses have increased and are payable immediately. Our trade payable days have decreased from 22 days to 15 days. The nature of these expenses is such that it is expected to remain largely unchanged in the foreseeable future. Hence, we have retained trade payable days at the Fiscal 2014 levels i.e. 15 days.

#### Means of Finance

Based on the assumptions and projections set out above, we estimate an incremental working capital requirement of approximately ₹164.28 million during Fiscal 2015.

Sr. No.	Particulars	Amount (in ₹ million)
1.	Net Proceeds of the Issue	84.17
2.	Working Capital facilities available	27.50
3.	Own Funds	52.61
<b>Total</b>		<b>164.28</b>

#### Indian Economy

India, one of the most populous countries in the world with an estimated population of 1.2 billion; i.e. approximately 17% of the total global population, is also one of the largest economies on a purchasing power parity basis with a GDP of approximately USD 1.9 trillion.

In 1991, the Government of India, with a view to promote economic stability and growth, adopted a series of comprehensive macroeconomic and structural reforms focused on deregulation of industry, accelerating foreign investment and implementing a privatization program for disinvestment in public sector units. Consequent to the reforms, India's economy registered robust growth over the last decade. The following table illustrates India's real GDP growth between Fiscals 2009 and 2013 (at factor cost at constant 2004-05 prices):

Fiscal 2009	Fiscal 2010	Fiscal 2011	Fiscal 2012	Fiscal 2013
6.72%	8.59%	9.32%	6.21%	4.96%

Source: <http://mospi.nic.in> “Summary of macroeconomic aggregates at constant (2004-05) prices, 1950-51 to 2012-13”

The Indian GDP is expected to grow at around 6% in Fiscal 2015, compared to a growth of 4.8% in Fiscal 2014.

India is expected to become the world's fifth largest consumer market by 2025 from its twelfth position in 2010. The key drivers for the growth in consumption are expected to be:

- *Higher affordability:* The rapid growth in the size of India's middle income and high income group is expected to result in doubling of the Indian household consumption by 2015.
- *Greater consumer acceptance:* Greater consumer acceptance of newer products driven by factors such as a younger population, faster urbanization, increase in the number of working women and lifestyle changes, along with other socio-economic factors is expected to result in a transition of the consumption pattern of the Indian consumer. Further, the growing international exposure among Indians has led to awareness of international cuisines resulting in increased acceptance and demand for such products.
- *Greater availability:* Deeper penetration, particularly of FMCG products, spurred by better distribution channels, coupled with spread of organized retail has increased availability manifold.
- *Greater awareness:* Greater media reach and penetration has, amongst others, resulted in a more aware and discerning consumer. Pertinently, this phenomenon is also no longer restricted to urban areas.

#### Temperature Controlled Logistics Industry

Temperature Controlled Logistics (TCL) refers to the series of links in the logistics chain of perishable products. TCL is responsible for preserving the quality to enable their availability during an off-season or making them available at locations far from the production/ processing locations. TCL comprises:

- *Warehousing:* Warehousing temperature sensitive products in custom built temperature controlled warehouses. The temperature controlled warehouse generally consists of several temperature zones capable of warehousing goods in the range of -25°C to +20°C.

- *Distribution*: Distribution entails primary and secondary transportation of temperature sensitive products from source to stores using temperature controlled containerized trucks and cargo trains. Certain containerized trucks are also modified to enable installation of temperature controlled zones.

Businesses which utilize cold chains in India include dairy, poultry and meat, seafood, ready-to-eat, chocolates, healthcare and pharmaceuticals, industrial products and fruit and vegetables.

India's temperature controlled logistics industry is estimated at ₹120,000 – ₹150,000 million and is poised to grow at 15% to 20%, year on year, for the next 3 to 5 years. The growth is expected to be driven *inter alia* by:

- An increase in the consumption of temperature sensitive perishables;
- Greater use of temperature controlled logistics in categories such as pharmaceuticals and fruits and vegetables; and
- An increase in the consumption of a gamut of niche and high end products that need to be maintained in temperature controlled environment.

Changing lifestyles and resultant consumer preferences for processed foods, off-season and exotic / high end fruits and vegetables and increased incidence of eating out (at quick service or other restaurants) is expected to drive the use of temperature controlled logistics. The spurt in growth is also expected to be fuelled by demand from Tier 2 and Tier 3 cities, in addition to the Tier I cities.

#### **Current state of the Indian TCL industry**

India falls under the category of low cold chain adoption countries i.e. countries with less than 10% of produce passing through a cold chain, reflecting a significant potential for growth.

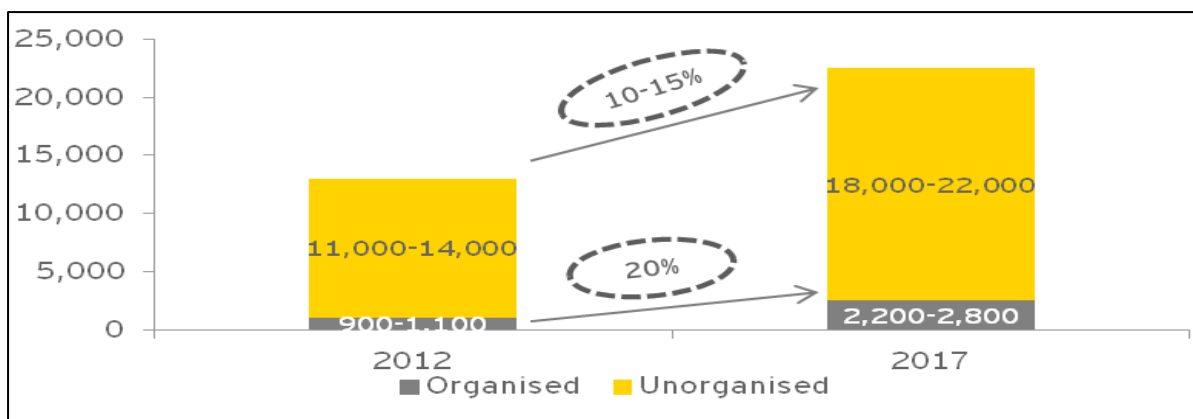

Further, TCL providers in India are largely fragmented and generally focus on a single region or one aspect of the logistics chain such as storage or transportation. Consequently, there are very few integrated temperature controlled logistics service providers, and in particular, integrated service providers with the ability to service customers on a pan-India basis.

It is generally estimated that the current share of organized players is only around 6%-7% in the temperature controlled warehousing segment and 15-20% in the temperature controlled transportation; consequently, the potential for growth in organized services is immense. As against an overall market growth of around 15%, organized outsourced temperature controlled services are expected to grow at around 20% p.a.

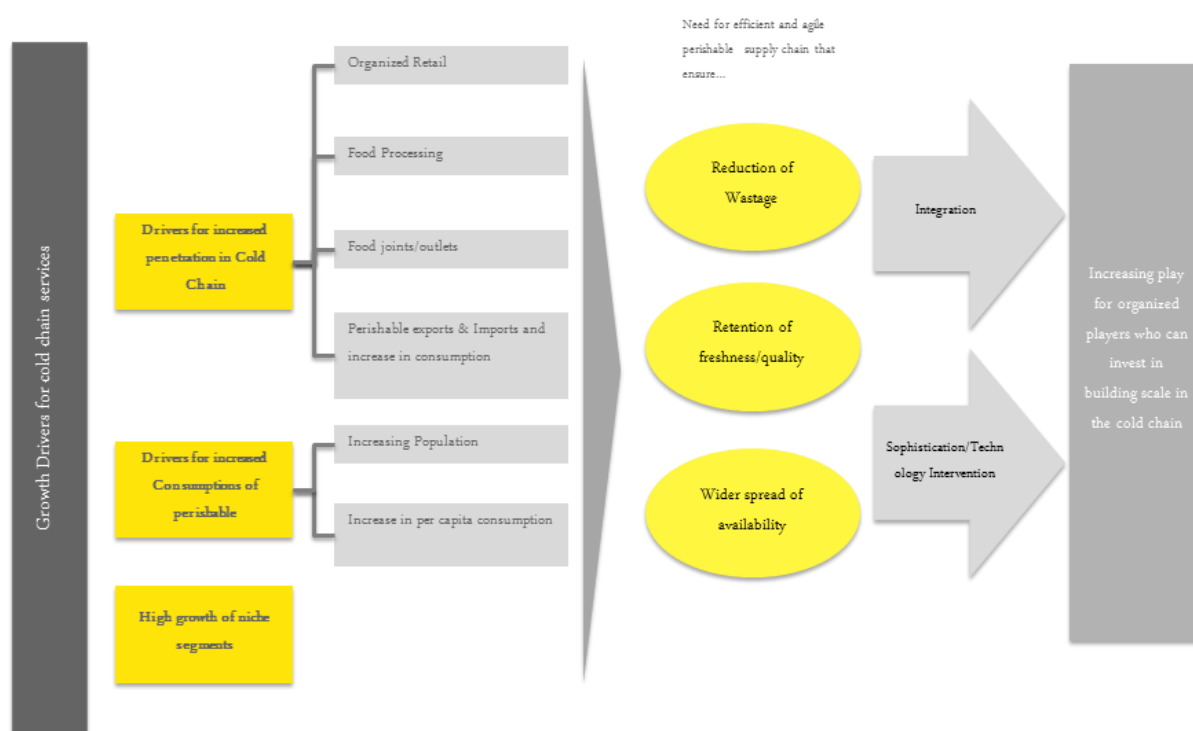

In terms of volume, the existing capacity is estimated to be around 30 million MT of temperature controlled warehousing and around 7,000-8,000 Reefer Vehicles.

Of the existing cold warehousing capacity, 75% is dedicated to potatoes while 23% is classified as '*Multipurpose*' i.e. catering to multiple commodities across dairy products, frozen foods, fruits and vegetables and the balance 2% is used across meat and seafood.

The following graph represents the potential growth for the organised and unorganised market:

The following schematic reflects the growth drivers in the TCL industry:

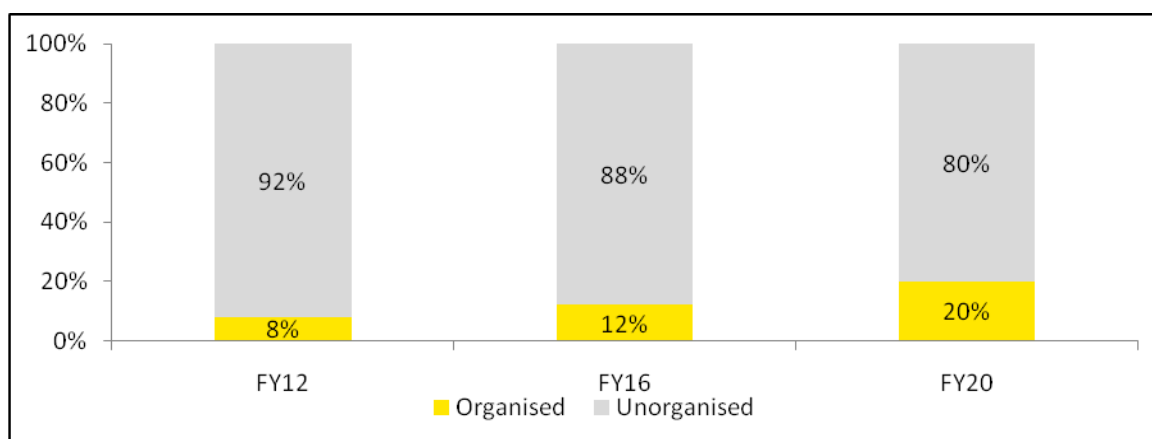

### 1) Greater penetration of organized retail

The Indian retail industry, estimated at USD 520 billion, has grown at 10.6% between 2010 and 2012 and is expected to increase to USD 750-850 billion by 2015. 'Food and Grocery' is the largest category within the retail sector constituting approximately 60% of the retail industry.

Of the total Indian retail market, organised retail constituting 8% is expected to grow at 30%, as against the overall market growth, which is forecasted at 16-18%. Further, the penetration of the organised retail segment in India is low as compared to other emerging economies such as China, which has penetration of over 20%.

The following graph represents the organised and unorganised retail share for the periods indicated therein (FY16 and FY20 (E)):

Source: India Retail Report 2013, Images Group

Within organized retail, the food segment is expected to grow at a rate of 14-15% which, consequently, is expected to fuel the demand for TCL services.

## 2) Shift in consumer preference for processed foods

While India is the second largest producer of food, food processing is still at a very nascent stage with less than 10% of the total quantity being processed.

The food processing industry is one of the largest in India, ranking fifth in terms of production, growth, consumption, and export. According to the Indian Council of Agricultural Research, the total value of the Indian food processing industry is expected to grow to USD 194 billion by 2015 from USD 121 billion in 2012.

Further, the food processing industries in India attracted FDI worth USD 1.81 billion from April 2000 to March 2013.

Food processing ranges between 7% to 18% across the perishable commodities with meat and poultry having the highest share.

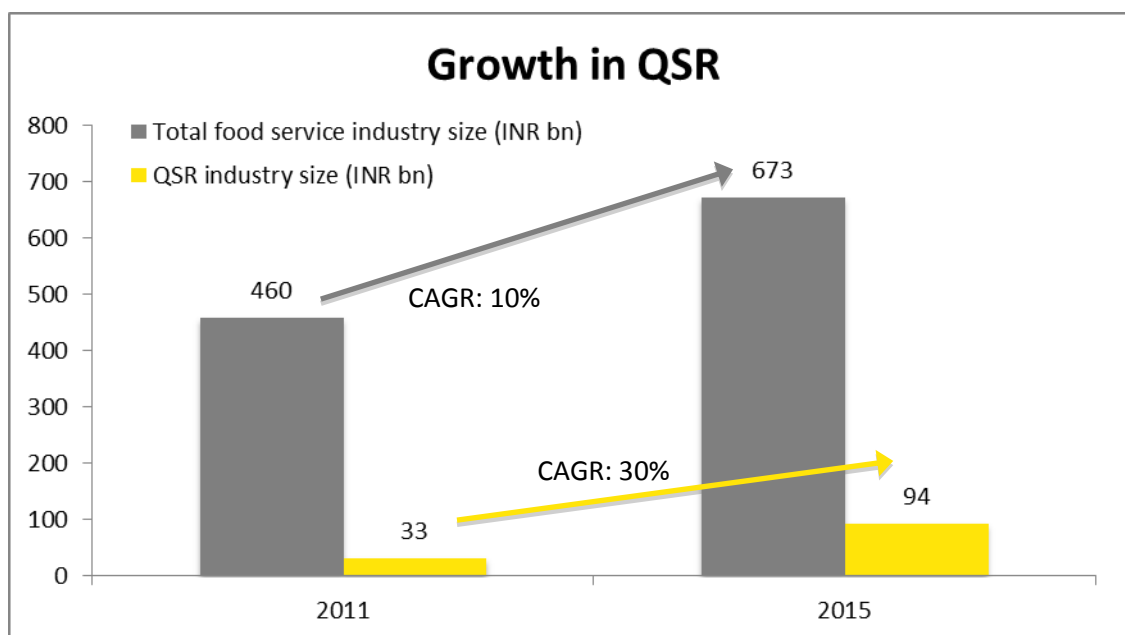

Segment	Size	Key products	Projected growth	% processed
Dairy products	121 MT	Value added milk, butter, ghee and cheese	8%	70% (Overall) 20% (organized)
Fruits and vegetables	233 MMT	Raw F&V, Fruit pulps, canned fruits and pickles	7%	2-4%
Meat & poultry	Approximately 11 MT	Cattle, Buffalo & Poultry	18%	32%
Seafood	8.4 MT	Seafood, frozen products & minced seafood products	7%	16%
Packaged products	₹80,000 million	RTE and RTC	8%	100%

Source: Food Industry of India Report, MOFPI, FICCI

With changing lifestyles and the emergence of nuclear families, India is witnessing a shift towards consumption of processed tertiary foods. These include yogurts, ready to cook and ready to eat food items, processed meat, seafood and poultry as well as confectionary, all of which require cold chain.

### 3) Growth in food services / Quick Service Restaurants (QSRs):

As food consumption habits in India are changing, QSRs and restaurants are expected to witness double-digit growth in the medium to long term. A younger population, higher rate of urbanization, rising disposable incomes, increased participation of women in the workforce and exposure to western lifestyles are leading to the experimentation with, and adoption of, new dietary habits. Indian food service sector is estimated to be INR 460 billion (USD 8.6 billion) in 2011 and is expected to grow at a compound annual growth rate of 10% until 2015. The QSR segment is expected to grow at a CAGR of 30% during the same period as indicated below:

According to the National Restaurant Association of India, 50% of consumers eat out at least once every three months, and this shift is epitomized by the growing presence of QSR and restaurants. It is estimated that in India, the expenditure on eating-out has more than doubled in the past decade, to about USD 5 billion a year and is expected to double again in around half that time.

A pre-requisite for providing standard product quality across stores is an efficient supply chain, but the rampant fragmentation of supply, limited modern warehousing and transportation infrastructure are significant hurdles, which is more pronounced in the case of perishable products.

Further, most fast food chains and QSRs operate with a central kitchen which prepares and semi cooks the dishes, which are then frozen and transported to smaller retail outlets where they are served to customers. This is expected to result in increased demand for cold chain operators particularly in Tier 2 and Tier 3 cities. The rapid expansion of food chains would lead to increasing demand for quality agricultural produce thereby necessitating cold chain infrastructure.

### 4) Emergence of high growth niche segments that require the cold chain

Other commodities that require a cold chain for preservation and transport include pharmaceuticals, reagents, aviation spare parts, certain chemicals and industrial products and luxury goods, flowers and spices which are also witnessing very healthy growth.

Enhanced standard of living and a focus on health has led to the emergence of the pharmaceutical industry as a leading niche segment in the cold chain. The pharmaceutical industry is growing at 23% (year on year) with vaccines being a key segment requiring TCL.

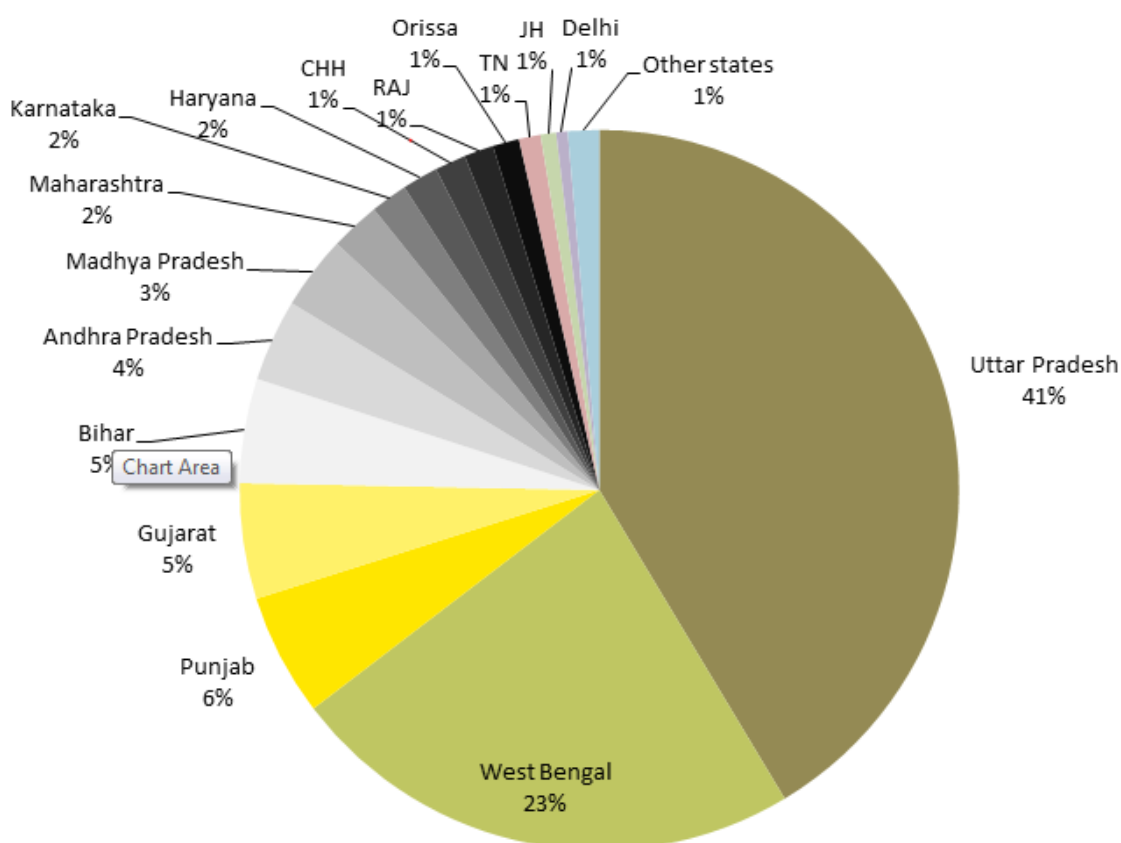

In pharmaceuticals, a large part of the biopharma segment (particularly vaccines) need to be maintained at lower temperatures, thus making the cold chains indispensable. In addition, greater regulatory focus is expected to result in a rise in demand for temperature controlled warehousing and transportation of high value formulations as well.

#### 5) Uneven distribution of capacity

In India, over 64% of the cold storages are currently located in two states of UP and West Bengal followed by Punjab, Gujarat and Bihar.

This highly skewed distribution of capacity provides significant opportunity for establishing operations in diverse parts of the country which have seen less investment in cold chain infrastructure. In addition, around 50% of the cold storages are located in the northern part of India and a large majority of the capacity is utilised towards storing potatoes. Consequently, the existing capacity is not utilised optimally for other products.

The schematic representation below sets out the skewed nature of capacity distribution in India.

#### Prominent characteristics of the TCL industry

**High capital and operating expenditure:** Maintaining the required controlled conditions in terms of temperature, humidity, air flow etc. necessitates investment in appropriate refrigeration and insulation equipment which makes the cold chain business capital intensive. Continuous operation of the cold store / refrigeration unit to avoid thermal shock also leads to high power consumption making profitability sensitive to power costs.

*Seasonality of Demand:* especially in the case of fruit and vegetables makes the cold chain business susceptible to seasonal variations. However, catering to commodities with complementary seasonality helps to avoid fluctuation in utilizations.

*Technical nature:* Provision of quality and reliable cold chain services necessarily requires an understanding of the specific requirements of perishables; for instance, apart from the temperature and humidity requirements of specific fruits, one needs to be aware of the ‘breathing’ (Air flow) requirement, moisture retention etc. Lack of this knowledge can lead to multiple issues that reduce or eliminate the value of a product.

The key trends shaping the industry include:

- Deeper penetration of high technology controlled atmosphere warehousing that enables significant increase in extendibility of the life of fruits;
- Increasing involvement of cold chain service providers in trading of fruits and vegetables to tie-up capacity utilization; and
- The industry enjoys increasing support from the government in the form of multiple policies and incentives to ensure development of requisite infrastructure to avoid waste and inefficiencies on account of lack of the cold chain.

### ***Key challenges***

The industry faces certain constraints which not only limits its growth but also increases the wastages and harm the industries which are dependent on cold chain.

- a) *Lack of quality cold warehousing infrastructure:* 75% of the cold storage capacity in India is dedicated to potatoes and only 25% is available for fruits and vegetables, processed foods, pharmaceutical and other products.
- b) *Lack of standards and protocols construction and operation of warehousing and transportation facilities:* Technical standards and specifications followed in India are often unsuitable for Indian conditions, which results in low performance of standard refrigerated systems. For example, standardization of reefer containers is limited which results in sub-optimal utilisation of available space leading to increased costs.
- c) *Low awareness:* At present, in India, the supply chain of most products is long and fragmented. A product changes many hands, between source and the delivery point, most of whom are unskilled at handling temperature sensitive products. Hence, the quality of the products deteriorates significantly before reaching the end consumer.
- d) *High fuel costs and power outages:* Operating costs of cold storages in India are double that of those in the developed countries. Fuel expenses constitute around 30% of the operating expenses of cold storage in India, as compared to 10% in the west. Further, while cold storages are heavily dependent on a steady power supply to maintain the temperature, large parts of India face regular power cuts. This coupled with increasing diesel prices leads to high costs. Investment in backup systems, on the other hand increases capital investment costs, making it even more unviable for smaller players.
- e) *Lack of skilled personnel:* The industry lacks quality manpower across levels from drivers, warehouse supervisors / managers to middle and senior management personnel. Consequently, the customers’ supply chain is generally not understood and, therefore, innovative and transformational solutions are generally absent. The lack of skilled personnel is accentuated by dearth in vocational or other training institutes focused on cold chain logistics.
- f) *Hidden Costs:* The average toll payable per kilometre travelled is very high in India and vehicles especially those carrying reefer loads are often subject to various checks by local authorities. This hampers the delivery times of temperature sensitive cargo and impacts the operating margins of logistics service providers.

## OUR BUSINESS

### Overview

We commenced our business as a trader of frozen marine products and in Fiscal 1998, we commenced cold storage operations at 4 (four) locations. We have, since then, expanded our operations to become an integrated temperature controlled logistics service provider with an ability to service customers on a pan-India basis.

Our operations can be classified into the following business segments:

1. Temperature controlled services; and
2. Ambient distribution.

While in previous financial years we only operated in the temperature controlled services and ambient distribution business segments, we have, in Fiscal 2014, commenced ambient warehousing as well.

Our warehousing solutions cover the complete spectrum of temperature ranges from ambient to chilled and frozen (i.e. +20°C to -25°C). We offer blast freezing facilities at our temperature controlled warehouses in Bengaluru, Mevalurkuppam, (near Chennai), Visakhapatnam, Serampore (near Kolkata), Taloja (near Mumbai), Ahmedabad, Palwal (near Delhi), Mubarakpur (near Chandigarh) and Surat. Our integrated 'Source to Stores' operations comprise warehousing, primary distribution and secondary distribution and value-added services including kitting, labelling, sorting and bulk breaking.

As of March 31, 2014, our operations comprised 23 temperature controlled warehouses across 14 locations in India including Serampore (near Kolkata), Taloja (near Mumbai), Palwal (near Delhi), Mevalurkuppam, (near Chennai) and Bengaluru capable of warehousing 58,543 pallets and 3,000 ambient pallets. Further, as of Fiscal 2014, we operated 370 Reefer Vehicles consisting of 307 leased and 63 owned vehicles. As of March 31, 2014, we engaged a total workforce of 1,490 including 383 permanent employees and 1,107 on a contract labour basis.

A majority of our temperature controlled warehouses are ISO 14001 (TUV-SUD), ISO 22000 (TUV-SUD) and FSSAI certified. In addition, 4 (four) of our temperature controlled warehouses are EIA and MPEDA (Marine Products Export Development Authority) certified and 4 (four) temperature controlled warehouses are certified under the Drugs and Cosmetics Act, 1940.

Our distribution services comprise primary and secondary transportation. The primary transportation (long haul) generally facilitates inter-city transport of products. The primary transport service includes door to door service, customized Milk Runs and Part Cargo Consolidation. We also provide secondary transportation i.e. last mile distribution, supplying, amongst others, QSRs, retail outlets, restaurants and the hotels.

The product segments we cater to include:

- Dairy products including butter and cheese;
- Ice-cream;
- Poultry and meat;
- Sea food;
- Ready-to-eat / ready-to-cook food products;
- Confectioneries including chocolate and baked products;
- Fruits and vegetables;
- Healthcare and pharmaceutical products; and
- Industrial products such as x-ray, and photo-imaging, films.

GDL is our Promoter and our largest shareholder. Our other shareholders include Mitsubishi Corporation, Mitsubishi Logistics Corporation, International Finance Corporation and Norwest Venture Partners VII-A Mauritius.

Our total revenue increased from ₹1,141.03 million in Fiscal 2013 to ₹1,552.33 million in Fiscal 2014. Our net profit as restated also increased from ₹198.79 million in Fiscal 2013 to ₹232.27 million in Fiscal 2014. Our total revenue in Fiscal 2014 comprised ₹1,518.57 million and ₹15.50 million, constituting 97.83% and 1.00%, respectively, from each of temperature controlled services and ambient distribution business.

### ***Competitive Strengths***

We believe that the following are our core competitive strengths:

#### **Pan-India integrated temperature controlled logistics services**

We believe we are one of the largest integrated temperature controlled logistics service providers operating 23 temperature controlled warehouses spread across 14 locations with an ability to service customers on a pan-India basis. We have set-up our temperature controlled warehouses adjacent to cities with a large potential for sourcing and/or consumption of temperature sensitive products including the larger cities such as Mumbai, Chennai, Bengaluru and Kolkata. Our distribution network comprises primary and secondary transportation. As of March 31, 2014, we operated 226 primary transportation vehicles with an ability to cover over 242 cities and towns and 144 secondary transportation vehicles supplying, amongst others, to QSRs, retail outlets, restaurants and hotels within a city. Our integrated operations enable us to maintain the temperature integrity of the customers' products from the point of origin to the consumption point, which is critical for product quality.

#### **Domain Knowledge and technological advantage**

We believe that our experience in setting-up and operating temperature controlled warehouses across different geographic locations in India enables us to better conceptualise and execute the construction of such warehouses.

In addition, we believe that the technology used in our operations is state-of-the-art and we have customised it to suit our operational requirements based on our experience and understanding of our customers' requirements. Our warehousing infrastructure comprises advanced equipment handling and racking system. Further, we use software systems such as warehouse management systems and enterprise resource planning (**ERP**). We employ a real time data logging system that enables us to monitor temperature variations in products both in our temperature controlled warehouses and in a majority of our Reefer Vehicles. In addition, a majority of our Reefer Vehicles are equipped with GPS and GPRS technologies including a few vehicles that are equipped with advanced geo-fencing (i.e., a virtual perimeter for a real-world geographic area) capabilities. These technologies enable us to monitor the progress of our Reefer Vehicles. Further, measures such as palletisation of our storage capacity have enhanced our ability to maintain the quality of the products by stacking products in a manner which enables us to employ more efficient inventory management systems such as first-expiry-first-out (**FEFO**) and first-in-first-out (**FIFO**). We are also members of global industry associations such as Global Cold Chain Alliance (**GCCA**), International Association of Refrigerated Warehouses (**IARW**) and World Food Logistics Organisation (**WFLO**), which enable us to keep abreast with the global developments in the temperature controlled logistics industry in addition to providing us with networking opportunities.

#### **Ability to attract competing brands**

We believe that one of the key factors of success in the temperature controlled logistics business in India is brand neutrality i.e. catering to customers who compete with each other in their respective business segments. We have, over the years, warehoused and distributed various products belonging to entities that are business competitors. Illustratively, we warehouse and distribute products for 4 (four) companies engaged in the business of ice-cream. In India's extremely competitive FMCG segment, the ability to rely on the service provider is critical. The inventory and the specific products managed by us are proprietary to each customer and disclosure of these details could have a significant impact on the performance of the product.

We believe that our continuing ability to service customers who compete with each other in business segments is a testament to our brand neutrality and the confidence reposed in us.

## **Management expertise**

We believe that we have a strong management team led by persons with significant experience in the logistics industry. Our Board comprises Directors who have extensive experience in the setting up and managing companies in the logistics sector. In addition, we also have a management team of qualified professionals, who have expertise and experience in the temperature controlled logistics sector. Our management team comprises skilled and capable professionals who assist the Board in identifying new opportunities and in implementing our business strategies. For further details please see the chapter entitled '*Our Management*' on page 148 of this Red Herring Prospectus.

## **Focus on quality**

Of our 23 temperature controlled warehouses 22 are ISO 22000 certified temperature controlled warehouses, 18 are ISO 14001 certified temperature controlled warehouses and 23 are FSSAI certified temperature controlled warehouses. We adhere to strict guidelines while managing our inventory. We employ a matrix which enables us to identify products that are incompatible to be stored together. Illustratively, we do not store vegetarian products with products containing meat ingredients. Further, our modern warehousing infrastructure comprises equipment handling and racking system as well as warehouse management systems and enterprise resource planning (ERP). We employ a real time data logging system that enables us to monitor temperature variations in products constantly irrespective of whether the product is in our temperature controlled warehouse or in our Reefer Vehicles. This ensures that we can address any concerns immediately thereby ensuring that the quality of the product is not compromised.

## **Established Client Base**

We cater to large corporates across various industry sectors such as dairy, ice-creams, chocolates, and poultry and meat, which avail of temperature controlled logistic services. Some of our more prominent customers are Hindustan Unilever Limited, Graviss Foods Private Limited, Novozymes South Asia Private Limited, McCain Foods India Private Limited, West Coast Fine Foods India Private Limited, Amrit Hatcheries Private Limited, Tamil Nadu Co-operative Milk Producers Federation, Shriram Distribution Services Private Limited, Kris Flexipacks Private Limited, Al-Karim Exports Private Limited, Indian Immunologicals Limited, Suguna Food Limited, Karnataka Co-operative Milk Producers' Federation Limited and Ferrero India Private Limited.

Most of our large customers (in terms of revenue and volumes) have remained largely unchanged over the last three years. During Fiscal 2012, Fiscal 2013 and Fiscal 2014, our top twenty customers constituting approximately 2.95%, 1.45% and 1.91% of our total customer base, contributed approximately ₹306.49 million, ₹443.66 million and ₹676.57 million of our total revenues, respectively. We believe that this is recognition of our capabilities and our ability to retain customers.

## **Strong promoter and investor base**

We were incorporated with the objective of providing captive services to our then promoter which was engaged in trading of frozen marine products. Subsequently, with the infusion of capital from Brooke Bond India Limited (as it then was) we expanded the scope of our operations to include other frozen food products. Since establishing integrated operations we were able to garner domestic and foreign investment from established companies such as GDL, our Promoter, and international operators such as Mitsubishi Corporation and Mitsubishi Logistics Corporation.

GDL, our Promoter, one of the largest Indian logistics service providers, operates, directly and through its subsidiaries, container freight stations located at major Indian ports and an inland container terminal. We believe that GDL's experience in the logistics sector, business relationships and financial stability instils confidence in our customers who prefer dependable and established service providers. Further, we leverage the corporate, institutional and banking relationships of GDL for our businesses operations. In addition, we believe that our association with GDL has also enabled us to attract strong financial investors such as IFC and NVP. We believe that we can leverage our association with GDL in augmenting our business.

We believe our strong investor base has, amongst others, been an important factor in establishing our reputation as an integrated solutions provider in an industry surfeit with regional and / or unorganised operators.

## **Business Strategy**

### **Maintaining our position in the temperature controlled logistics service industry**

The size of the Indian temperature controlled logistics industry estimated to be around ₹120,000 – ₹150,000 million, at present, is expected to grow at 15%-20% per annum over the next 5 years with the organised market growing at the higher end of the range. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We believe that as one of the leading temperature controlled logistics service providers, we are strategically placed to benefit from the expected growth in the industry.

Further, the Indian retail industry is expected to increase from an estimated USD 520 billion in 2012 to USD 750-850 billion by 2015. The food and grocery industry constituting 60% is the largest component of the retail industry. The organised retail segment, though, constitutes only 8% of the total Indian retail market. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We are proposing to increase our warehousing capacity and distribution network to enable us to meet the growing demands of the market. Further, given that a vast majority of our customers are the producers / importers of temperature sensitive products, lack of well-equipped storage facilities and transportation facilities limits their ability to stock such products which, consequently, acts as a deterrent against increasing production / import. Enhancing our storage facilities and scaling up our distribution model, we believe, will facilitate an increase in manufacturing / produce / import of temperature sensitive products. In addition to broadening our customer base, we expect to leverage our existing relationships with established customers to garner additional business.

In addition to enhancing our storage capacity, we are also evaluating setting up temperature controlled warehouses in food parks for processing fruits and vegetable. The Ministry of Food Processing Industries, Government of India, has launched the Mega Food Parks Scheme (MFPS), which aims to accelerate the growth of food processing industry in India by facilitating the establishment of a strong food processing infrastructure backed by an efficient supply chain. As of Fiscal 2012, the Government had approved 13 such projects were approved and 15 have been accorded in-principle approval. We believe that we have the capability to set up temperature controlled warehouses in food parks which we believe will enable us to augment our growth.

### **Augmenting our market share by penetrating markets catered to by regional and / or unorganised operators and in Tier II and Tier III cities**

A vast majority of the temperature controlled logistics service providers are regional and / or unorganised operators. At present, it is estimated that over 90% of the temperature controlled logistics warehousing and around 80% of temperature controlled distribution are catered to by regional and / or unorganised operators who have neither the requisite facilities nor the technical skills to be able to offer complete logistics solutions. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] With increasing consumer awareness, higher standards of living and heightened concerns regarding hygiene, we expect the demand for quality food products to increase. Further, we believe that increasingly strict food safety norms coupled with increasing consumer awareness will prompt entities in the consumer foods business to move towards established temperature controlled service providers. We believe that our ability to handle temperature sensitive products, technical skills and adherence to food safety standards will enable us to penetrate markets catered to by regional and unorganised operators.

At present, we have the ability to service customers on a pan-India basis with temperature controlled warehousing operations near a few prominent cities such as Mumbai, Chennai, Bengaluru and Kolkata. However, over the last decade the demand for quality food products has increased and consumer spending in Tier II and Tier III cities has been steadily on the rise, and this trend is expected to continue. For instance, it is expected that growth in the QSR segment (expected to grow at a rate of 30% per annum) will be particularly prominent in Tier II and Tier III cities. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] We believe that Tier II and Tier III cities present significant growth opportunities to our customers and, consequently, us. Expanding our operations into cities such as Baramati, Surat and Bhubaneswar will widen our reach and attract potential customers who are either operating or proposing to venture into nascent markets. We believe that our expanded warehousing operations coupled with the standard and quality of service we offer will augment our growth.

### **Increasing our revenue share from value added services**

We believe that, apart from expanding our reach to new customers, one of the critical means of increasing our margins is to enhance the range of services that we offer to our existing customers. We propose to increase our

revenues from our existing value added services (VAS) such as kitting, labelling and sorting. Further, we attempt to evaluate our customers' needs on a regular basis which enables us to customise our service offerings.

In Fiscal 2014, VAS contributed 1.05% and 5.20% to our revenue and profits respectively. Consequently the revenue earned from these services increased by 109.15% for the same period. While the revenue generated from VAS is not significant, it is an important component of our business operations since the cost involved in providing VAS is negligible.

The key criterion in providing value added services is the availability of floor space. One of the main objects of this Issue is to set-up new temperature controlled warehouses which, when complete, will increase the available floor space significantly. We believe the additional floor space we will gain from expansion will boost our ability to provide value added services to our customers.

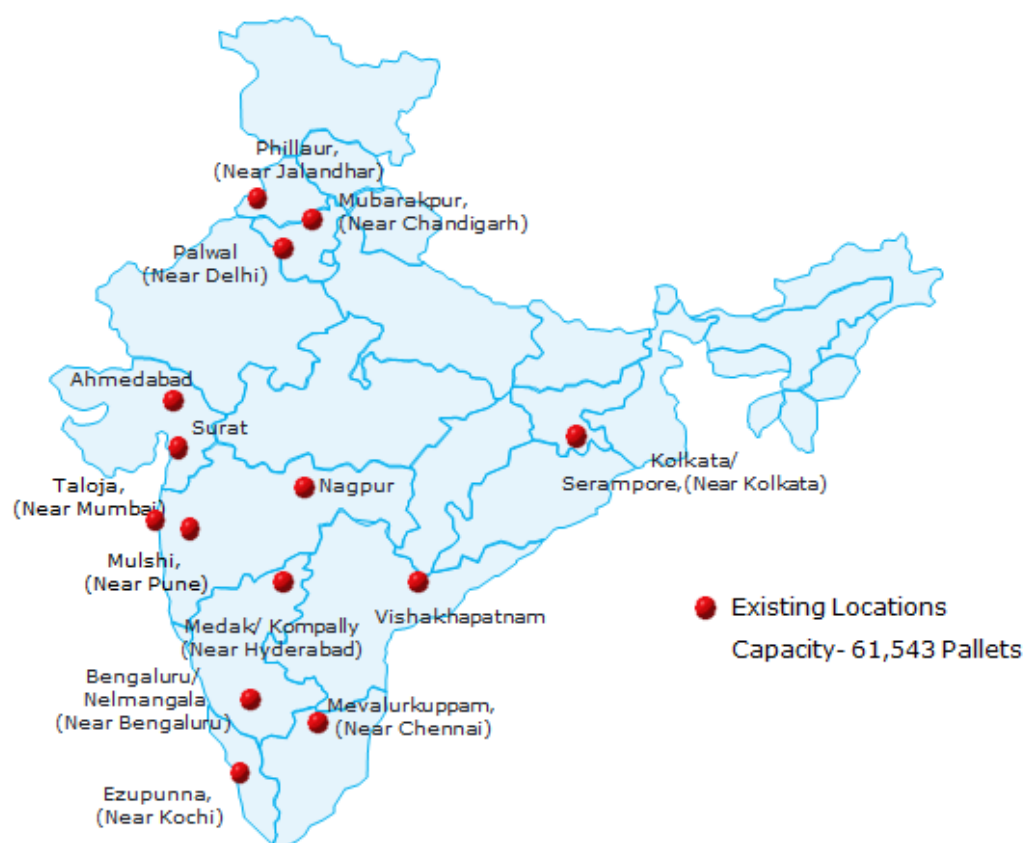

Further, we propose to provide additional VAS in the fruit and vegetable segment. We are proposing to offer certain other value added services such as pre-cooling, ripening and processing of fruits and vegetables in addition to our already existing services such as cleaning, grading, sorting, cutting and packing of fruits and vegetables. We believe we have the required infrastructure, expertise and available labour force to add these to our service offerings.

### **Increasing our client engagement through vendor consolidation**

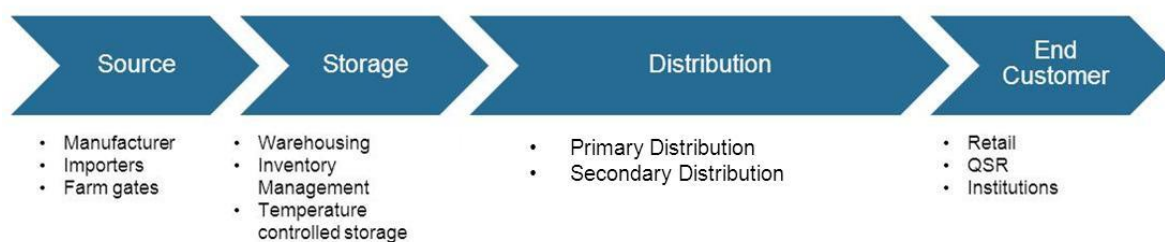

Of the total Indian retail market, organized retail constituting 8% is expected to grow at 30%, as against the overall market growth, which is forecasted at 16-18% in the same period. Within the organized retail the food segment is expected to grow at a fast pace of 14-15% on the back of which demand for temperature controlled logistics is expected to increase. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*]. With several MNC's proposing to enter the Indian markets in the organized retail segment, we believe that this business proposition will provide us a comprehensive understanding of purchase planning, consumer preferences, demand and supply, store management and vendor management in the QSR or hospitality segment. This, we believe, would augment our ability to cater to entry level MNC QSRs. We are in negotiations for managing the entire temperature controlled supply chain of certain prominent QSRs. We intend to engage the services of a supply chain management facilitator to provide us critical support.

### ***Our Business Operations***

We offer integrated temperature controlled logistics (TCL) services including warehousing and distribution of frozen and chilled products. As at March 31, 2014, our 'source to stores' warehousing and distribution network with the ability to service customers on a pan-India basis is depicted below.

## Process flow chart

We store products primarily from manufacturers and importers, such as HUL, Godrej Tyson Foods Limited, Kraft Foods, West Coast Fine Foods India Private Limited and McCain Foods India Private Limited.

## Temperature Controlled Warehousing

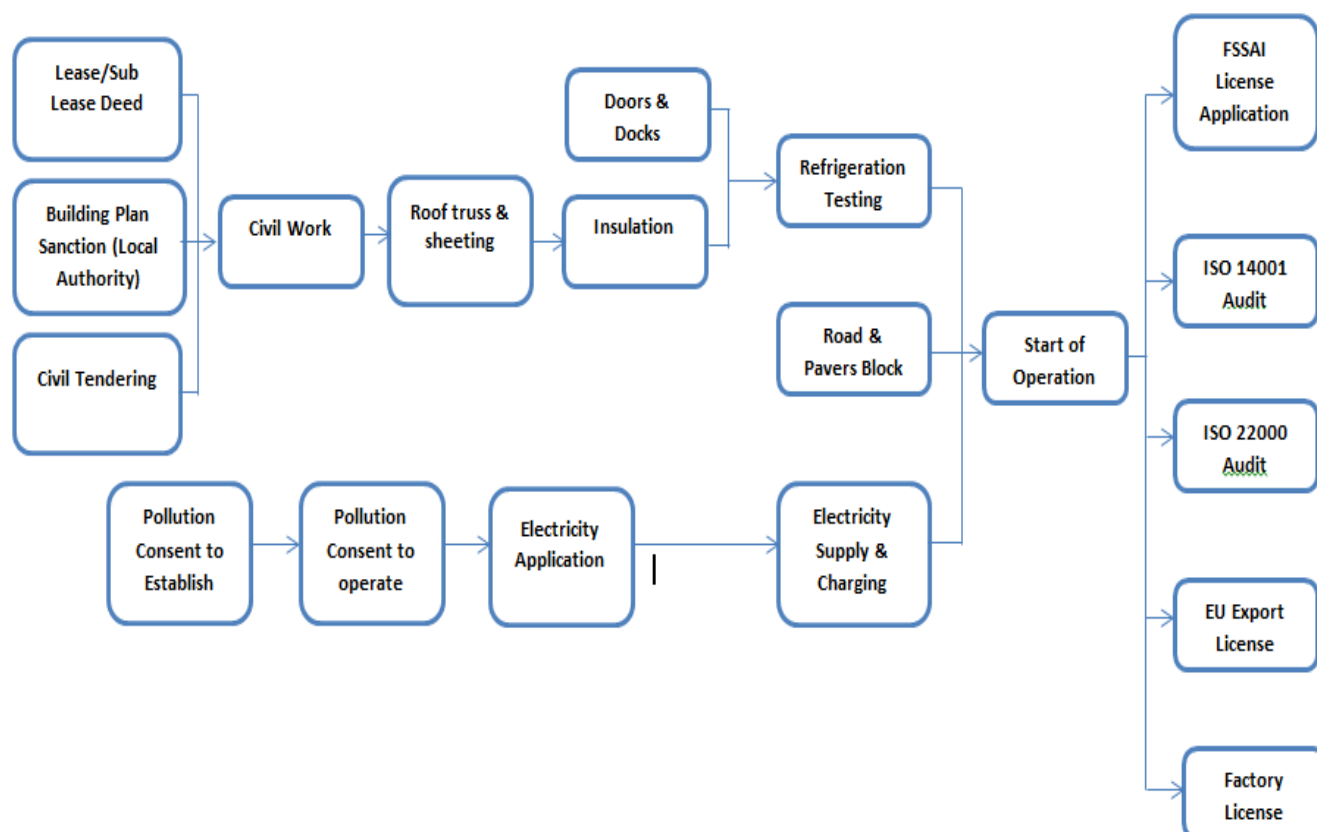

Our warehousing solutions cover the complete spectrum of temperature ranges from ambient to chilled and frozen. In addition, we are one of the few service providers with blast freezing capabilities. Blast freezing enables us to reduce the temperature of certain products such as poultry and meat, received in our temperature controlled warehouse quickly, by subjecting it to  $-40^{\circ}\text{C}$ . Our temperature controlled warehouses, built with state-of-the-art technology, are equipped to manage temperatures from  $+20^{\circ}\text{C}$  to  $-25^{\circ}\text{C}$ . We offer blast freezing facilities at our temperature controlled warehouses in Bengaluru, Mevalurkuppam, (near Chennai), Visakhapatnam, Serampore (near Kolkata), Talaja (near Mumbai), Ahmedabad, Palwal (near Delhi), Mubarakpur (near Chandigarh) and Surat.

All our temperature controlled warehouses adhere to strict standards on food safety and hygiene. Our temperature controlled warehouses are operated under process control systems which help maintain a pre-determined temperature for different products and provide for ERP based inventory management system.

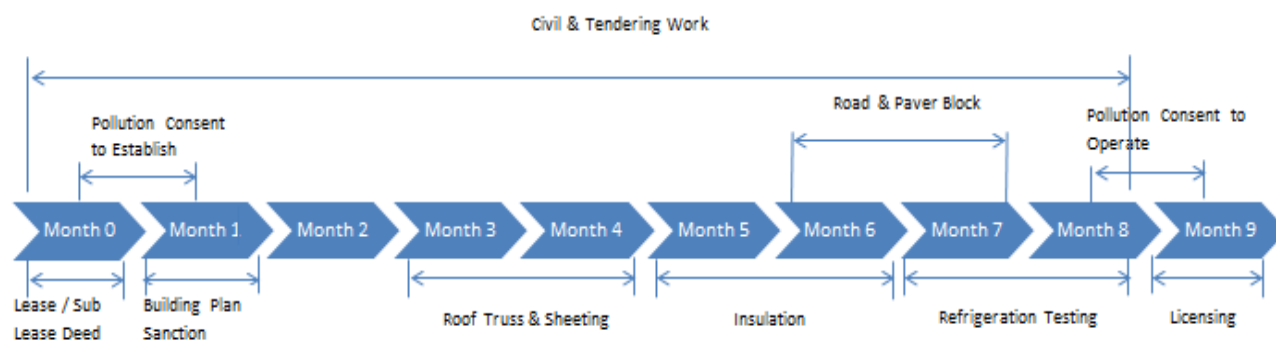

### Setting-up a temperature controlled warehouse

Set out below is a pictorial representation of the process of setting up temperature controlled warehouse.

### Indicative Process of Setting up of Temperature Controlled Warehouses

### Indicative Timelines for the Above Process

Approvals/ registrations / licenses are required to be obtained for each of the warehouses at two stages:

- a. Prior to establishment; and
- b. Prior to operations

For each warehouse, prior to establishment, the following approvals / registrations / licenses are required

- i. Approval of the plan from the Chief Inspector of factories;
- ii. Consent to establish under the Air (Prevention and Control of Pollution) Act, 1981 from the relevant pollution control board; and
- iii. Consent to establish under the Water (Prevention & Control of Pollution) Act, 1974 from the relevant pollution control board

For each warehouse, after establishment and prior to operations, the following approvals / registrations / licenses are required:

- i. Factories licence, including, obtaining the certificate of stability and registration as a factory;
- ii. Consent to operate under the Air (Prevention and Control of Pollution) Act, 1981;
- iii. Consent to operate under the Water (Prevention & Control of Pollution) Act, 1974; and
- iv. FSSA license under the Prevention of Food Adulteration Act, 1954.

For details of licences/approvals and registrations we have obtained, please see the chapter entitled '*Government and Other Approvals*' on page 294.

Our temperature controlled warehouses are equipped with:

- Refrigeration systems;
- Reach truck to handle operations in palletized conditions;
- G+4 heavy-duty racking system;
- Air-curtain equipped poly-urethane insulated doors;
- Generators;
- Leaf styled dock door opening; and
- Computerized FEFO programme which ensures intelligent inventory rotation on a real time basis.

Our temperature controlled warehouses comprise insulated sandwiched panels made of polyurethane lined with metal skins on both sides of specified density. The panels are made from chlorofluorocarbon (CFC) free polyurethane materials. Polyurethane is resistant to harsh environmental factors such as abrasion, heat and solvents as compared to steel and plastic. Further, Polyurethane is a unique material that offers the elasticity of rubber combined with the toughness and durability of metal. In addition, polyurethane has high thermal insulation properties which make it more suitable than brick-and-mortar walls. The structure is properly covered with steel sheeting to protect from rain and wind. The salient features of our temperature controlled warehouses include:

- Multi-facility environment friendly refrigerant – Freon 404(a);
- Multi-chamber, multi temperature warehouse to accommodate various products such as dairy products including cheese and butter, confectionaries including chocolates and other food items including meat and sea food;
- Rooms designed to accommodate products in temperature range of +20 °C to -25 °C;
- Adequately illuminated warehouses with special subzero light fittings;
- Complete power backup with multiple generators;
- Many of our temperature controlled warehouses are configured to enable the reefer units to operate within our warehousing facilities through a plug-in power source; and
- Our temperature controlled warehouses are ISO 14001, ISO 22000 and FSSA (Food Safety and Standards Act, 2006) certified. In addition, our temperature controlled warehouses located in Visakhapatnam, Hyderabad, Kochi and Kolkata are EU (European Union), MPEDA (Marine Products Exports Development Authority) certified.

Additionally, some of our temperature controlled warehouses are equipped with blast freezers. We offer blast freezing facilities at our temperature controlled warehouses in Bengaluru, Mevalurkuppam, (near Chennai), Visakhapatnam, Serampore (near Kolkata), Taloja (near Mumbai), Ahmedabad, Palwal (near Delhi), Mubarakpur (near Chandigarh) and Surat.

We store our products in pallets that are capable of enduring weights of up to 1 (one) tonne (i.e. 1,000 kg). The G+4 (i.e. ground + 4 (four) levels) racking and pallet system employed by us increases our storage capacity and enables stacking of products to up to a height of 22 (twenty two) feet. The storing and unloading is done by using state-of-the-art forklifts.

Set out below are details of our temperature controlled warehouses as on March 31, 2014.

## **Transportation**

While a majority of our customers arrange for the transportation of products to our temperature controlled warehouses, some of our customers rely on us to transport their products from the factories / point of import to our temperature controlled warehouses. We arrange for the transportation of the customers' products from point of sourcing to our temperature controlled warehouse through Reefer Vehicles or ambient distribution vehicles operated by us.

## **Utilities**

Our power requirements are met through state electricity boards and back-up diesel generator sets. Given that electricity is critical for maintaining the integrity and quality of the products warehoused with us, our back-up diesel generators are crucial to our operations. In the past, we have been able to ensure uninterrupted warehousing operations even during crises. For instance, in July 2012 there was complete break-down of the northern, eastern and north-eastern electricity grids (which impacted electricity supply to almost 22 states in India) resulting in severe disruption in electricity supply for about 2 days. Our operations, however, were uninterrupted since we operated our back-up generator sets continuously including by procuring the vast quantities of diesel required from one of the government controlled oil suppliers.

Further, water while not critical to our operations is generally sourced from state water boards and / or borewells.

## **Distribution Reach**

Our distribution reach has two divisions:

*Primary Distribution:* The primary transportation (long haul) generally facilitates inter-city transport of products. The primary transport service includes door to door service, customized Milk Runs and Part Cargo Consolidation. As of March 31, 2014, we operated 226 primary transportation vehicles, consisting of 198 leased and 28 owned vehicles, with an ability to cover over 242 cities and towns.

*Secondary Distribution:* The secondary transportation handles distribution of products within a city i.e. last mile distribution, supplying, amongst others, QSRs, retail outlets, restaurants and the hotels. As of March 31, 2014, we operated 144 secondary transportation vehicles consisting of 109 leased and 35 owned vehicles for supplying, amongst others, to QSRs, retail outlets, restaurants and hotels within a city.

## **Temperature Controlled Distribution**

As of March 31, 2014, our operations comprised 23 temperature controlled warehouses across 14 locations in India including Serampore (near Kolkata), Taloja (near Mumbai), Palwal (near Delhi), Mevalurkuppam, (near Chennai) and Bengaluru capable of warehousing 58,543 pallets and 3,000 ambient pallets. As of March 31, 2014, we operated 370 Reefer vehicles consisting of 307 leased and 63 owned vehicles. As of March 31, 2014, we engaged a total workforce of 1,490 including 383 permanent employees and 1,107 on a contract labour basis.

We operate vehicles with a capacity of ferrying loads ranging from 2.5 tonnes to 20 tonnes. Each Reefer Vehicle is equipped with a data logger to ensure continuous monitoring of temperature and are global positioning system (GPS) enabled for real time tracking. The data logger and the GPS enable us to provide our customers with real-time information about the cargo even when in transit. Further, the data logger enables us to ensure that the prescribed temperature is maintained to ensure that the quality of the temperature sensitive products is not compromised.

## **Ambient Distribution**

We commenced the ambient distribution business i.e. non-temperature controlled in March, 2012. Through ambient distribution we offer services in primary and secondary distribution segment and containerized transportation.

## **Consignment Agency Business**

In addition to the refrigerated transport service described above, we also provide retail distribution through a consignment agency model for certain select customers. As of March 31, 2014, we provide this service including to Graviss Foods Private Limited, one of our customers.

Services offered under this model include:

- Indenting, order bookings and category management;
- Invoicing and receivable management;
- Inventory management, supply & tax administration;
- Safe handling of payment collection process from customers through dedicated teams;
- Reverse logistics and safe disposal of expired and excess stocks as per Government Norms; and
- Statutory norms follow up including tax management such as sales tax, octroi and cess.

## **Value Added Services**

In addition to the regular warehousing and distribution services, we provide value added services to enhance our appeal to customers. We provide value added services such as kitting, labelling, sorting, stuffing and de-stuffing of containers, repacking and bulk breaking. Further, we sort, grade, pack and wash select fruits and vegetables. The blast freezer installed at some of our major temperature controlled warehouses enables us to accelerate the reduction in temperature by freezing the products to a temperature of  $-40^{\circ}\text{C}$ .

## **Information Technology**

We have over the years invested in upgrading our IT hardware and software to ensure that we provide complete logistics solutions to our customers. We believe that our technology is state-of-the-art and is comparable to the technologies used in more developed markets. Further, we believe that our current infrastructure in terms of software as well as hardware is scalable. We have also successfully implemented a customised ERP system.

Our corporate office at Bengaluru and all our temperature controlled warehouses are connected through a separate leased line – a virtual private network provided and maintained by a reputable IT company. The salient features of our IT system are set out below.

- Real – time self service which gives the customer complete access to its inventory towards ensuring timely corrective action;
- Full traceability throughout the supply chain;
- Centralized management of inventory, orders, receipts and shipments;
- Aging, shelf life, on hand inventory, and stock status reports;
- Historical volume and performance metrics are reviewed on a consistent basis and are provided to customers to enable them to optimize their inventory management; and
- E – mail alerts to proactively manage events and make fact based decisions.

## **Safety**

Our Board and top management are aware of the need to instill safety procedures and continuously update our safety preparedness. Some of the steps we have adopted towards ensuring safety within our facilities and on our Reefer Vehicles are:

- Safety calendar for the year – we set aside specific days for workshops and training programmes;
- Fire and first aid workshops;
- Periodical safe product handling seminars which are conducted in conjunction with the manufacturers of the equipment used in our temperature controlled warehouses; and
- Periodic driver training modules both internal as well as by sending our drivers to the Ashok Leyland Training School.

Further, our MHE operators also undergo training on a regular basis with equipment manufacturers.

### **Global Associations**

We are members of various global industry associations such as GCCA, IARW and WFLO. Membership with these associations enables us to participate in international conferences and seminars on the temperature controlled logistics and generally keep abreast with the global developments in our industry including through industry newsletters and magazines. In addition, membership also provides us with networking opportunities and an ability to reach out to clients spread across geographies. It is also pertinent to note that the GCCA, in particular, provides us access, amongst others, to scientific advisors.

### **Competition**

The Indian temperature controlled logistics business is largely catered to by regional service providers with approximately 6%-7% in warehousing and 15-20% in transportation catered to by organised operators. Further there are very few organised operators who have a comprehensive pan-India presence. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] In addition, a number of service providers operate only in one or the other sector i.e. either temperature controlled warehouse business or temperature controlled distribution business. Therefore, we compete against various operators in different business segments in different geographic locations in addition to the regional and / or unorganised service providers.

### **Customers**

We operate our temperature controlled warehouses from a mix of owned and leased properties. Consequently, we propose to operate a majority of our temperature controlled warehouses on leased properties.

While we are generally free to terminate the lease with notice, the properties at Taloja (near Mumbai), Bengaluru and Mevalurkuppam, (near Chennai) are subject to a lock-in period of between 9 and 10 years.

Details of the property on which we operate our warehouses as of July 31, 2014 are as follows:

#### *Contract Labour (Regulation and Abolition) Act, 1970*

Our Company is regulated by the provisions of the Contract Labour (Regulation and Abolition) Act, 1970 (**CLRA**) which requires our Company to be registered as a principal employer and prescribes certain obligations with respect to welfare and health of contract labourers. ### **Intellectual Property Laws**

In India, trademarks enjoy protection under both statutory and common law. The Trade Marks Act, 1999 protects a distinct 'mark'. A trade mark is essentially any mark capable of being represented graphically and distinguishing goods or services of one person from those of others and includes a device, brand, heading, label, ticket, name, signature, word, letter, numeral, shape of goods, packaging or combination of colours or combination thereof. Once a mark is registered, it is valid in India only, for a period of 10 years and can be renewed from time to time in perpetuity. Registration of a trademark grants an owner the right to exclusively use the trademark as a mark of goods and services and prevents the fraudulent use of deceptively similar marks by

any third party. The Trade Marks Act also makes special provision for application of marks as 'collective marks'. The Registrar of Trademarks is the authority responsible for registration of the trademarks, settling opposition proceedings and rectification of the register of trademarks.

#### **Shops and Establishments legislations in various states**

The provisions of various Shops and Establishments legislations, as applicable, regulate the conditions of work and employment in shops and commercial establishments and generally prescribe obligations, *inter alia*, in respect of registration, opening and closing hours, daily and weekly working hours, holidays, leave, health and safety measures and wages for overtime work.

#### **Property Laws**

The Transfer of Property Act, 1882 (**TP Act**) lays down general principles for the transfer of immovable property in India. It specifies the categories of property that can be transferred, the persons competent to transfer property, the legitimacy of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The TP Act recognizes, among others, sale, mortgage, charge and lease as forms in which an interest in an immovable property may be transferred.

The preparation of financial statements in conformity with generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

#### **b) Tangible Assets**

Tangible assets are stated at acquisition cost, net of accumulated depreciation and accumulated impairment losses, if any, except in case of land, which is stated at cost. Subsequent expenditures related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. The company capitalises all costs relating to the acquisition, installation and construction of fixed assets, up to the date when the assets are ready for commercial use. Items of fixed assets that have been retired from active use and are held for disposal are stated at the lower of their net book value and net realizable value and are shown separately in the financial statements. Any expected loss is recognised in the Statement of Profit and Loss, losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

Depreciation on additions/ deletions to fixed assets is calculated on pro-rata basis from/up to the date of such additions/ deletions. The Company provides depreciation on straight-line basis method at the rates specified under Schedule XIV to the Act. Assets individually costing less than Rs. 5,000 are fully depreciated in the year of purchase.

All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period. With respect to long-term foreign currency monetary items, the Company has adopted the following policy:

### **(3) Other Employee Benefits**

**Compensated Absences:** Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year are treated as other long term employee benefits. The Company’s liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

### **i) Borrowing Cost**

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised in the Statement of Profit and Loss in the period in which they are incurred.

### **j) Current and Deferred Tax**

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the Company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternative Tax credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

## **Annexure IV- Basis of Preparation and Significant Accounting Policies**

### **k) Leases**

Assets acquired under operating leases, where a significant portion of the risk and rewards of ownership are retained by the lessor, are classified as operating leases. Lease rentals are charged to the Statement of Profit and Loss on accrual basis.

### **l) Employees' Stock Option Scheme**

Equity settled stock options granted under "ESOP Scheme" are accounted for as per the accounting treatment prescribed by the Guidance Note on Employee Share based Payments issued by the Institute of Chartered Accountants of India. The intrinsic value of the option being excess of market value of the underlying share immediately prior to date of grant over its exercise price is recognised as deferred employee compensation with a credit to employee stock option outstanding account. The deferred employee compensation is charged to Statement of Profit and Loss on straight line basis over the vesting period of the option. The options that lapse are reversed by a credit to employee compensation expense, equal to the amortised portion of value of lapsed portion and credit to deferred employee compensation expense equal to the unamortised portion.

### **m) Impairment of Assets**

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased.

### **n) Provisions and Contingent Liabilities**

Provisions: Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date and are not discounted to its present value.

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

### **o) Cash and Cash Equivalents**

In the cash flow statement, cash and cash equivalents include cash on hand, demand deposits with banks, other short term highly liquid investments with original maturities of three months or less.

## **Annexure IV - Basis of Preparation and Significant Accounting Policies**

### **p) Segment Reporting**

Revenue and expenses have been identified to segments on the basis of their relationship to the operating activities of the segment. Revenue and expenses, which relate to the Company as a whole and are not allocable to segments on a reasonable basis, have been included under 'Unallocable corporate expenses'.

### **q) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share are the net profit for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

- 2 In the audited financial statements of the Company for the years ended March 31, 2014, 2013, 2012, 2011 and 2010, certain provisions/ liabilities created in earlier years were written back. For the purpose of this statement, the said provisions/ liabilities have been appropriately adjusted in the respective years in which they were originally created.

- 4 Debts, which were considered doubtful and provided (net of provision for doubtful debts written back) for the years ended March 31, 2014, 2013, 2012, 2011 and 2010 have been appropriately adjusted in the respective years to which they relate.
- 5 In the audited financial statements of the Company for the years ended March 31, 2013, MAT credit entitlements pertaining to financial year ended March 31, 2012 and financial year ended March 31, 2011, Rs.13.74 million and Rs. 0.36 million respectively, aggregating Rs. 14.10 million, were written-off. For the purpose of this statement, the said MAT credit entitlement write-offs have been appropriately adjusted in the respective years to which they originally relate. Further, in the audited financial statements of the Company for the year ended March 31, 2012, excess tax liability, originally provided in year ended March 31, 2011 under MAT provisions, of Rs. 8.88 million was written back and consequently excess MAT credit entitlement was written off to the same extent of Rs. 8.88 million with nil impact on Profit and Loss. ### Overview

We commenced our business as a trader of frozen marine products and in Fiscal 1998, we commenced cold storage operations at 4 (four) locations. We have, since then, expanded our operations to become an integrated temperature controlled logistics service provider with an ability to service customers on a pan-India basis.

Our operations can be classified into the following business segments:

1. Temperature controlled services; and
2. Ambient distribution.

While in previous financial years we only operated in the temperature controlled services and ambient distribution business segments, we have, in Fiscal 2014, commenced ambient warehousing as well.

Our warehousing solutions cover the complete spectrum of temperature ranges from ambient to chilled and frozen (i.e. +20°C to -25°C). We offer blast freezing facilities at our temperature controlled warehouses in Bengaluru, Mevalurkuppam, (near Chennai), Visakhapatnam, Serampore (near Kolkata), Taloja (near Mumbai), Ahmedabad, Palwal (near Delhi), Mubarakpur (near Chandigarh) and Surat. Our integrated 'Source to Stores' operations comprise warehousing, primary distribution and secondary distribution and value-added services including kitting, labelling, sorting and bulk breaking.

As of March 31, 2014, our operations comprised 23 temperature controlled warehouses across 14 locations in India including Serampore (near Kolkata), Taloja (near Mumbai), Palwal (near Delhi), Mevalurkuppam, (near Chennai) and Bengaluru capable of warehousing 58,543 pallets and 3,000 ambient pallets. As of March 31, 2014, we operated 370 Reefer vehicles consisting of 307 leased and 63 owned vehicles. As of March 31, 2014, we engaged a total workforce of 1,490 including 383 permanent employees and 1,107 on a contract labour basis.

A majority of our temperature controlled warehouses are ISO 14001 (TUV-SUD), ISO 22000 (TUV-SUD) and FSSAI certified. In addition, 4 (four) of our temperature controlled warehouses are EIA and MPEDA (Marine Products Export Development Authority) certified and 4 (four) temperature controlled warehouses are certified under the Drugs and Cosmetics Act, 1940.

Our distribution services comprise primary and secondary transportation. The primary transportation (long haul) generally facilitates inter-city transport of products. The primary transport service includes door to door service, customized Milk Runs and Part Cargo Consolidation. We also provide secondary transportation i.e. last mile distribution, supplying, amongst others, QSRs, retail outlets, restaurants and the hotels.

The product segments we cater to include:

- Dairy products including butter and cheese;
- Ice-cream;
- Poultry and meat;

- Sea food;
- Ready-to-eat / ready-to-cook food products;
- Confectioneries including chocolate and baked products;
- Fruits and vegetables;
- Healthcare and pharmaceutical products; and
- Industrial products such as x-ray, and photo-imaging, films.

GDL is our Promoter and our largest shareholder. Our other shareholders include Mitsubishi Corporation, Mitsubishi Logistics Corporation, International Finance Corporation and Norwest Venture Partners VII–A Mauritius.

Our total revenue increased from ₹1,141.03 million in Fiscal 2013 to ₹1,552.33 million in Fiscal 2014. Our net profit as restated also increased from ₹198.79 million in Fiscal 2013 to ₹232.27 million in Fiscal 2014. Our total revenue in Fiscal 2014 comprised ₹1,518.57 million and ₹15.50 million, constituting 97.83% and 1.00%, respectively, from each of temperature controlled services and ambient distribution business.

### ***Factors affecting our results of operations***

The business of our Company is subject to various risks and uncertainties including those discussed in Section entitled ‘*Risk Factors*’ beginning on page 15 of this Red Herring Prospectus. Our financial condition and results of operations are affected by various factors of which the following are of particular importance.

### ***Ability to successfully penetrate Tier II and Tier III cities while maintaining growth in Tier I cities***

Over the last decade, the demand for quality food products has increased and consumer spending in Tier II and Tier III cities has been steadily on the rise, and this trend is expected to continue. However, a vast majority of the temperature controlled logistics service providers are regional and / or unorganised operators. At present, an estimated 90% of the temperature controlled logistics warehousing and around 80% of temperature controlled distribution business is catered to by regional and / or unorganised operators. (Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*)

We propose to set up temperature controlled warehouses in or around Tier II and Tier III cities with a view to expanding our reach and catering to the expected growth from these cities. We intend to leverage our strengths including our:

- existing client base;
- technology advantage; and
- focus on quality,

to successfully penetrate Tier II and Tier III cities in India. Our ability to obtain land for our warehouses may be a significant determinant of our penetration of Tier II and Tier III cities.

### ***Competition***

The Indian temperature controlled logistics business is largely catered to by regional service providers with approximately 6%-7% in warehousing and 15-20% in transportation catered to by organised operators. Further there are very few, if any, organised operators who have a comprehensive pan-India presence. [Source: *The Temperature Controlled Logistics Industry in India - Ernst & Young LLP*] In addition, a number of service providers operate only in one or the other sector i.e. either temperature controlled warehouse business or temperature controlled distribution business. Therefore, we compete against various operators in different business segments in different geographic locations in addition to the regional and / or unorganised service providers.

Further, the temperature controlled logistics industry has not seen the advent of the large corporate houses or multinational companies and, consequently, the scale of operations of most organised competitors is not significantly different from ours. The entry of large domestic or multinational companies may have a detrimental effect on our margins and business operations.

### ***Operating expenses***

Our operating expenses primarily comprise hire charges, vehicle fuel expenses, power charges and vehicle running expenses. In addition, increases in rental costs and energy costs such as electricity and diesel prices may lead to an increase in operating expenses. We seek to reduce the ratio of our operating expenses to our revenues, including through initiatives such as preventive maintenance and better diesel-consumption monitoring. Further, to the extent that we are unable to pass on any increases in operating expenses through to our customers, we could face pressure on our margins.

### ***Ability to Borrow at Favourable Rates***

Our business requires significant amounts of capital expenditure. In the past, we have financed capital expenditure through a mix of equity infusion and borrowing. As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources for our operations and could constrain our ability to obtain financing on favourable terms and refinance existing indebtedness. In addition, certain of our financing agreements include conditions and restrictive covenants that require us to obtain consents from the respective lenders prior to carrying out certain activities and entering into certain transactions. Any future changes in regulatory restrictions or in the terms typically found in our indebtedness agreements may adversely affect our ability to borrow at favourable rates, which may in turn adversely affect our results of operations.

### ***Ability to successfully implement our growth strategies***

One of the key determinants of our results of operations will be our ability to implement our growth strategies. As a part of our overall growth strategy, we are venturing into more nascent markets and proposing to set up temperature controlled warehouses in such geographic areas. Our ability to complete these projects in time and the time frame within these facilities reach optimum capacity utilisation will be a key factor in our success.

### ***Changes in economic conditions in India***

Our results of operations are highly dependent on the overall economic conditions in India. Any slowdown in the Indian economy including due to changes in interest rates, government policies, taxation, social and civil unrest and political, economic or other developments, could adversely affect our business and results of operations. Further our success depends to a significant extent on consumer confidence and spending on the products that we warehouse and distribute, which is influenced by general economic conditions and discretionary income levels. Many factors affect the level of consumer confidence and spending, particularly, in the QSR and restaurant segments, including recession, inflation, deflation, political uncertainty, availability of consumer credit, taxation, and unemployment. Our performance may decline during recessionary periods or in other periods where one or more macro-economic factors, or potential macro-economic factors, negatively affect the level of consumer confidence.

### **Our Significant Accounting Policies**

#### **a) Use of Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

#### **b) Tangible Assets**

Tangible assets are stated at acquisition cost, net of accumulated depreciation and accumulated impairment losses, if any, except in case of land, which is stated at cost. Subsequent expenditures related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Our company capitalises all costs relating to the acquisition, installation and construction of fixed assets, up to the date when the assets are ready for commercial use.

Items of fixed assets that have been retired from active use and are held for disposal are stated at the lower of their net book value and net realizable value and are shown separately in the financial statements. Any

expected loss is recognised in the Statement of Profit and Loss, losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

Depreciation on additions/ deletions to fixed assets is calculated on pro-rata basis from/upto the date of such additions/ deletions. Our Company provides depreciation on straight-line basis method at the rates specified under Schedule XIV to the Companies Act. Assets individually costing less than Rs. 5,000 are fully depreciated in the year of purchase.

The leasehold land including building constructed thereon is being amortized over the lease period.

**c) Intangible Assets**

Intangible assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortised on straight-line basis over a period of 5 years, based on management estimate. The amortization period and the amortization method are reviewed at the end of each financial year.

**d) Inventories**

Inventories are stated at lower of cost and net realisable value. Cost includes only the purchase cost of the goods. Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to record the sale.

**e) Revenue Recognition**

Income from transportation, storage and handling activities is accrued on completion of the service. Income from commission on consignment sales is recognised on the completion of consignment sales.

**f) Other income**

Interest: Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

**g) Foreign Currency Transactions**

**Initial Recognition**

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

**Subsequent Recognition**

As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period. With respect to long-term foreign currency monetary items, our Company has adopted the following policy:

- Foreign exchange difference on account of a depreciable asset, is adjusted in the cost of the depreciable asset, which would be depreciated over the balance life of the asset.
- In other cases, the foreign exchange difference is accumulated in a Foreign Currency Monetary Item Translation Difference Account, and amortised over the balance period of such long term asset/ liability.

A monetary asset or liability is termed as a long-term foreign currency monetary item, if the asset or liability is expressed in a foreign currency and has a term of 12 months or more at the date of origination of the asset or liability.

Exchange differences on restatement of all other monetary items are recognised in the Statement of Profit and Loss.

## **h) Employee Benefits**

### **(1) Defined Contribution Plan**

Contribution towards provident fund and pension scheme for employees is made to the regulatory authorities which are recognised by the Income Tax Authorities and administered through appropriate authorities, where our Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as our Company does not carry any further obligations, apart from the contributions made on a monthly basis.

### **(2) Defined Benefit Plan**

Our Company provides for gratuity, a defined benefit plan (**Gratuity Plan**) covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment. Our Company's liability is actuarially determined by an independent actuary (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

### **(3) Other Employee Benefits**

**Compensated Absences:** Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year are treated as other long term employee benefits. Our Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

## **i) Borrowing Cost**

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised in the Statement of Profit and Loss in the period in which they are incurred.

## **j) Current and Deferred Tax**

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, our Company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternative Tax credit is recognised as an asset only when and to the extent there is convincing evidence that our Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that our Company will pay normal income tax during the specified period.

**k) Leases**

Assets acquired under operating leases, where a significant portion of the risk and rewards of ownership are retained by the lessor, are classified as operating leases. Lease rentals are charged to the Statement of Profit and Loss on accrual basis.

**l) Employees' Stock Option Scheme**

Equity settled stock options granted under "ESOP Scheme" are accounted for as per the accounting treatment prescribed by the Guidance Note on Employee Share based Payments issued by the Institute of Chartered Accountants of India. The intrinsic value of the option being excess of market value of the underlying share immediately prior to date of grant over its exercise price is recognised as deferred employee compensation with a credit to employee stock option outstanding account. The deferred employee compensation is charged to Statement of Profit and Loss on straight line basis over the vesting period of the option. The options that lapse are reversed by a credit to employee compensation expense, equal to the amortised portion of value of lapsed portion and credit to deferred employee compensation expense equal to the unamortised portion.

**m) Impairment of Assets**

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased.

**n) Provisions and Contingent Liabilities**

**Provisions:** Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date and are not discounted to its present value.

**Contingent Liabilities:** Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of our Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

**o) Cash and Cash Equivalents**

In the cash flow statement, cash and cash equivalents include cash on hand, demand deposits with banks, other short term highly liquid investments with original maturities of three months or less.

**p) Segment Reporting**

The accounting policies adopted for segment reporting are in conformity with the accounting policies followed by our Company. Revenue and expenses have been identified to segments on the basis of their relationship to the operating activities of the segment. Revenue and expenses, which relate to our Company as a whole and are not allocable to segments on a reasonable basis, have been included under 'Unallocable corporate expenses'.

**q) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining our Company's earnings per share are the net profit for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of

calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

## 5.6 BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP / Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP / Prospectus.
- (b) Under-subscription in Retail category is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB category is not available for subscription to other categories.
- (c) In case of under subscription in the Net Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Net Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP.
- (d) **Illustration of the Book Building and Price Discovery Process**

*Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes bidding by Anchor Investors.*

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs. 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

(e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“Alternate Book Building Process”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

## **SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE**

# Snowman Logistics Ltd

One-time assessment

**CRISIL IPO Grade 4/5 (Above Average)**

March 10, 2014

## Grading summary

CRISIL Research has assigned a CRISIL IPO grade of '**4/5**' (pronounced 'four on five') to the proposed IPO of Snowman Logistics Ltd (Snowman). This grade indicates that the fundamentals of the IPO are **above average** relative to the other listed equity securities in India. However, this grade is not an opinion on whether the issue price is appropriate in relation to the issue fundamentals. A CRISIL IPO Grading is not a recommendation to buy / sell or hold the securities to which it relates (or any other securities); it does not comment on the issue price, future market price or suitability for a particular investor.

The assigned grade reflects Snowman's strong position as a leading domestic integrated cold chain company and good long-term prospects for the cold chain industry. CRISIL Research expects the cold chain industry to grow at a healthy pace over the next few years (15-17% CAGR over FY13-16) driven by growing demand from end-product industries, uneven regional distribution of cold storages in India and favourable government policies.

The grade is supported by Snowman's strong end-product portfolio, loyal clientele, professional management, seasoned shareholders and modern cold chain infrastructure. The company has increased its pallet (a structural foundation of a unit load for efficient handling and storage of products) capacity by five times in less than two years without any adverse impact on its margins. It further plans to expand its capacity to 1,00,000 pallets by FY16.

The grade is constrained by risks related to Snowman's aggressive capacity expansion plans. The company might not be able to generate sufficient business to run at a healthy utilisation with the increased capacity which can put pressure on its profitability and growth.

Snowman's operating income grew at a CAGR of 48.5% from ₹346 mn in FY10 to ₹1,137mn in FY13 driven by capacity expansion, broadening of the end-product portfolio and increase in the client base. EBITDA margin improved by 650 bps from 16% in FY10 to 22.5% in FY13 due to increase in utilisation and improvement in per pallet realisation. Consequently, EBITDA expanded at a CAGR of 66.3% from ₹56 mn in FY10 to ₹256 mn in FY13.

Adjusted PAT grew at a CAGR of 79.1% from ₹38.2 mn in FY10 to ₹219.4 mn in FY13 on the back of strong growth in EBITDA and tax credit on account of Section 35AD of Income Tax Act 1961. Consequently, PAT margin improved from 11% in FY10 to 19.3% in FY13. The company has a net debt of ₹885 mn as of FY13.

## Detailed Grading Rationale

### A. Business Prospects

**Cold chain industry has strong growth prospects driven by growth in end-user industries and organised retail**

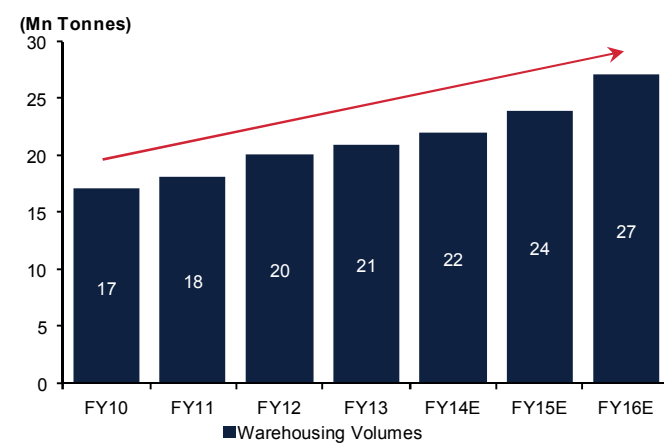

CRISIL Research expects the ₹150 bn (FY13 estimate) cold chain industry to grow at a healthy 15-17% over the next three years driven by growth in end-user industries and organised retail. Within the cold chain industry, warehousing services (which constituted about half of Snowman's revenues in FY13) are expected to grow at a CAGR of 15-17% from ₹125 bn in FY13 to ₹218 bn in FY16.

**Figure 1: Cold chain storage revenues to grow at a CAGR of 16% over FY13-16**

Source: CRISIL Research

**Figure 2: Cold chain storage volumes to grow at a CAGR of 9% over FY13-16**

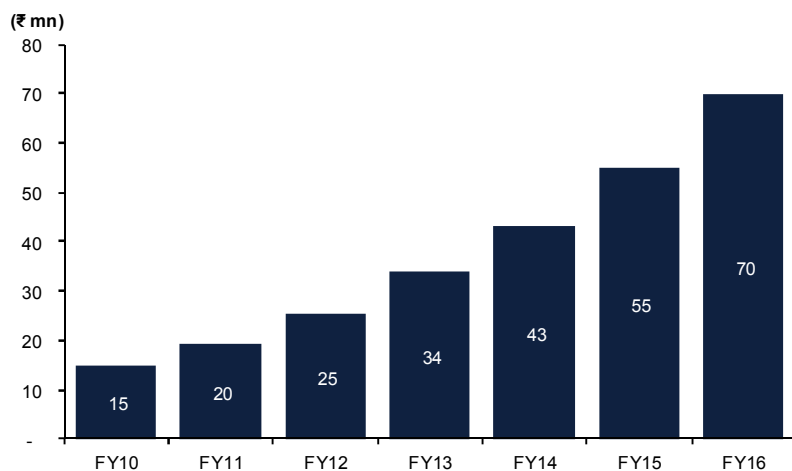

Source: CRISIL Research

The main growth drivers in the domestic cold chain industry are:

**Proliferation of QSRs:** The QSR (Quick Service Restaurant) industry is projected to grow at a healthy CAGR of 30% over FY13-16 driven by factors such as favourable demographics, rise in disposable incomes and increase in urbanisation. On the supply-side, the entry of international brands, expansion by the existing players and an improving retail infrastructure are expected to ensure strong growth. This proliferation of multinational QSR chains in India should create a demand for a pan-India cold chain logistics companies who can provide high quality services across India to the QSR chains.

Figure 3: QSR revenues to grow at 30% CAGR over FY13-16

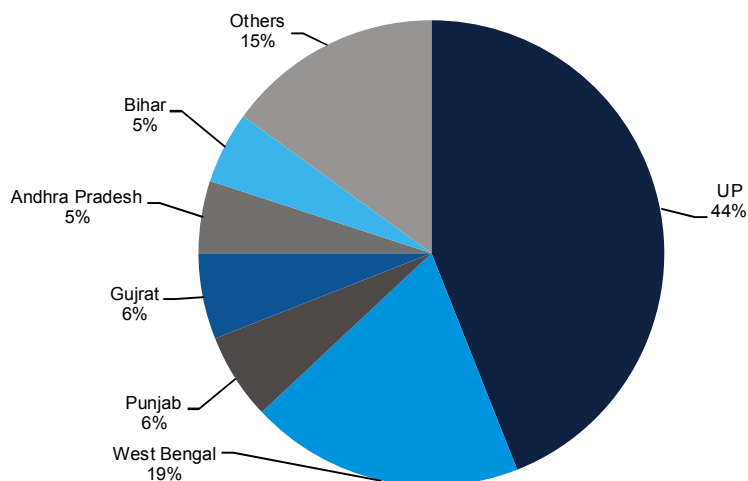

Source: CRISIL Research

**Increase in penetration of organised retail:** Although food and grocery collectively constitute 60% of overall retail, the penetration of this group in organised retail is quite low (2.5%). Due to the perishable nature of food and grocery products such as ice cream, butter and cheese, the biggest challenge for this group is the under-developed cold chain infrastructure. This challenge creates an opportunity for cold chain service providers.

**Skewed distribution of cold storage units in India:** India has a very uneven distribution of cold storage units. For instance, 44% of the cold storage in India is concentrated in Uttar Pradesh (Figure 4). This creates a demand for cold chain services in areas with low density of cold storage units.

Figure 4: Skewed distribution of cold storages in India

Source: CRISIL Research

**Increase in export demand for seafood:** CRISIL Research expects the fisheries export industry to grow to US\$5.19 bn in 2015-16 at a three-year CAGR of 14% driven by increasing demand from key importing countries such as the US, the EU, Japan, China and the Middle East.

India is one of the largest producers of seafood in the world but 20-30% of annual seafood produce is wasted as its shelf life is short. Although most of the seafood is caught in summer, there is a huge demand for seafood throughout the year. For assured supply during the non-catch season, there is a need for cold storages to maintain quality and prevent spoilage of seafood.

**Emergence of niche segments that require cold chain services:** There is an untapped demand for cold chain services from niche segments such as pharmaceuticals, enzymes, reagents, films, etc. due to high temperature sensitivity of the products and potential high loss in case of spoilage.

***The industry is shifting towards high premium end-products and organised play***

The cold chain industry is moving towards high premium end-products and the organised segment from the plain vanilla storage of potatoes.

The cold chain industry in India is highly fragmented with the unorganised segment comprising an estimated 90% market share. The unorganised sector consists mainly of low quality warehouses offering simple storage or standalone transporters. Although there are many standalone transporters, most of the organised players have a limited number of cold storage units. The main players in the organised sector are Snowman, RK Foodlands, Coldex, Devbhomi, Kausar India, Fresh and Healthy Enterprises and Bulaki Deep Freeze.

There are almost 6,500 cold storages across the country, most of which are operated by small players with less than five cold storage units. In terms of catering to end products, 74% of the cold storage facilities are used for potatoes. With growing demand for multipurpose storage facilities, the share of potato storage, which is a low-margin business, is declining.

***Favourable government policies to promote cold chain infrastructure***

Favourable government policies offer incentives such as viable gap funding, tax cuts, liberal FDI norms etc. to the cold chain infrastructure companies to encourage them to invest heavily in the industry.

In FY12, the Government of India awarded infrastructure status to the cold chain industry in India to curb post-harvest losses, increase realisations for farmers and lower price fluctuations in perishable commodities.

**Infrastructure status**

- The cold chain industry was awarded infrastructure status in FY12

**Viability gap funding**

- Funding up to 40% of the project cost and 55% of the project cost in the case of north-eastern areas

**Tax and duty cuts**

- 5% concession on import duty, service tax exemption, excise duty exemption on several items.

**Depreciation benefits**

- Deduction of 150% of the total capex while computing taxable income

**Foreign investment norms**

- 100% FDI norms & liberal ECB norms

**NCCCD establishment**

- Established in 2011 to look into matters related to cold chain infrastructure

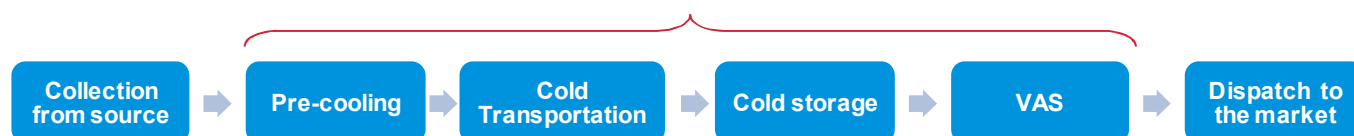

**Proposed Policies**

- Financial outlay for cold chain infrastructure and food parks of ₹1,675 cr and ₹3,250 cr respectively.

***Snowman - a complete cold chain provider with presence across value chain***

Snowman is a leading integrated cold chain player in India with presence across the value chain of the industry. The company offers high quality cold chain storage, distribution and value-added services. It has high-end equipment and handling mechanism, and uninterrupted power and fuel supply. Further, the company's presence in 13 locations allows it to offer services to clients across India.

Snowman charges its clients a premium based on high quality offering, pan India operations and presence across the value chain.

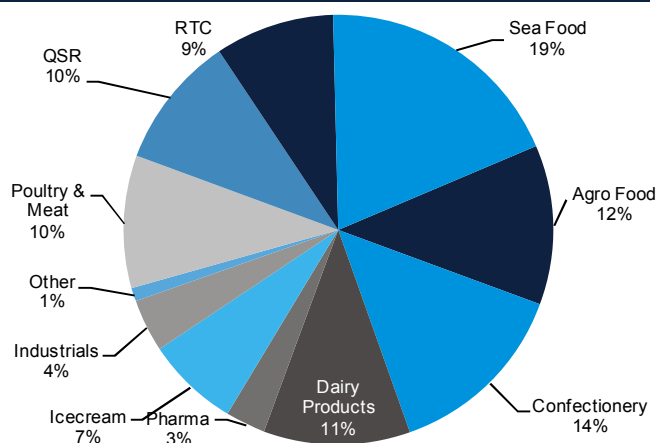

***The value chain***

### ***Caters to diverse end-product industries to counter demand volatility and realise growth potential***

Snowman offers cold chain logistic solutions for diverse industries such as seafood, poultry products, fruits and vegetables, dairy products, ice-cream, retail, pharmaceuticals and some other niche segments. Serving diverse end products helps the company in countering demand volatility as most of the end products that require cold storage have seasonal demand.

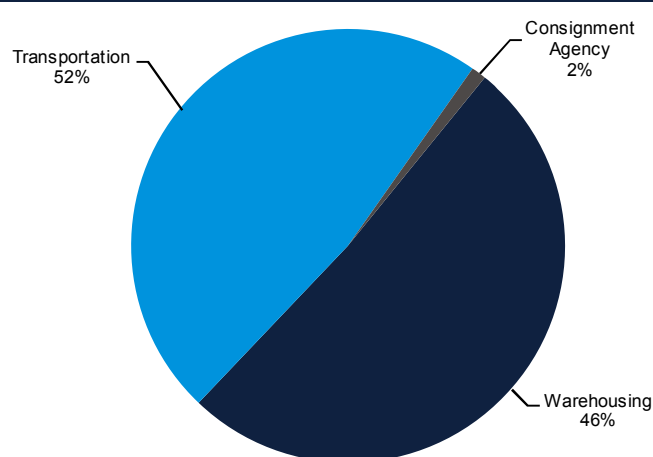

Snowman is also well placed to gain from the growth prospects in the end-product industry it serves.

### ***Well diversified and loyal clientele***

Snowman's clients are from diverse industries such as FMCG, QSRs, poultry, seafood, dairy, food processing, confectionaries and pharmaceutical. The strong and diversified customer base helps the company in running at high utilisation throughout the year. Snowman's key clients are Hindustan Unilever Ltd (HUL), Al-Karim Exports Private Ltd, McCain Foods India Pvt. Ltd (McCain), Novozyme South Asia Pvt. Ltd (Novozyme), Ferrero India Pvt. Ltd (Ferrero), Graviss Foods Private Ltd etc.

The company has relatively low client concentration as its top 25 clients contribute ~40% to the company's total revenues.

### ***Three-pronged service model in warehousing***

- **Dedicated chamber:** The entire chamber capacity is sold on a dedicated basis. Rent for the capacity is charged irrespective of whether the client uses capacity or not.
- **Guaranteed space:** A fixed number of pallets are guaranteed to the client, which can be used whenever required. If the client is not using its capacity, Snowman can use this capacity for pay-and-park customers.
- **Pay and park:** Under this model, clients pay for the capacity and store their products.

The three-pronged strategy helps the company in maintaining high utilisation.

### ***Superior services compared with unorganised players***

Snowman has been focusing on offering superior services to its clients compared with the unorganised players. It offers value-added services (VAS) services including cleaning, grading, sorting, packaging and inventory management to its clients.

Snowman uses very efficient modern warehousing infrastructure which includes real time data logging and enterprise resource planning (ERP system) to monitor and track the quality and quantity of products stored and being transported. Clients can themselves track and monitor the temperature of its products in storage and distribution.

Snowman uses Freon 404 as refrigerant, which though expensive is safer and better compared with ammonia used by the unorganised players. Use of ammonia has regulatory repercussions as well.

**Table 7: Freon vs ammonia**

Desired properties	Freon	Ammonia
Industrial Name	R404	R-717
Low boiling point	-46.1	-33.3
Non-corrosive to metal	Non-corrosive	Corrosive
Flammability	Non-inflammatory	Flammable
Toxicity	Non-toxic	Toxic
Explosive nature	Non-explosive	Explosive
Cost	Expensive	Cheap
Easy to locate leaks by odour or other suitable indicator	No	Yes

**Source: CRISIL Research**

Snowman also offers ultra freezing facility to its clients. It has installed a blast freezer which can be used to freeze products to as low as -40 degree Celsius. Bacteria multiply fastest between +8°C (46°F) and +68°C (154°F). By reducing the temperature of cooked food from +70°C (158°F) to +3°C (37°F) or below within 90 minutes, the food is rendered safe for storage and future consumption.

## Key risks

### ***Aggressive incremental capacity expansion***

Snowman is aggressively expanding its capacity from 36,210 pallets in FY13 to 100,000 pallets in the next couple of years. In case the company is unable to generate sufficient business, its utilisation could come under pressure, subsequently putting pressure on profitability and growth.

### ***Cost overruns in the capacity expansion plan***

Cost overruns and delay in building the new warehouses may hamper growth and put pressure on the company's financials.

## B. Financial Performance

Snowman's operating income grew at a CAGR of 48.5% from ₹346 mn in FY10 to ₹1,137mn in FY13 driven by capacity expansion, broadening of end product offering and increase in the client base. EBITDA margin improved by 650 bps from 16.0% in FY10 to 22.5% in FY13 due to increase in utilisation and improvement in per pallet realisation. Consequently, EBITDA grew at a CAGR of 66.3% from ₹56 mn in FY10 to ₹256 mn in FY13.

Adjusted PAT grew at a CAGR of 79.1% from ₹38.2 mn in FY10 to ₹219.4 mn in FY13 on the back of strong growth in EBITDA and tax credit on account of Section 35AD of Income Tax Act 1961. Consequently, PAT margin improved from 11% in FY10 to 19.3% in FY13.

Due to large capex of ₹1,153 mn in FY13, the company has a negative free cash flow. It has a net debt of ₹885 mn as of FY13.

Under the current management, the company has successfully increased its client base and strengthened its offerings.

### ***Seasoned promoters and other shareholders***

GDL as a promoter brings in experience in the logistics industry. GDL's chairman, Mr Pillai, was instrumental in completely revamping and restructuring Snowman's management in 2007, when GDL became the majority shareholder.

IFC, a World Bank member, is another strong shareholder. It has 12.46% stake in Snowman. Since its investment in 2010, IFC has been very critical in bringing the best practices, quality assurance checks, increasing efficiency, setting out specific environmental measures and giving direction to the recent capacity expansion plan. The company has obtained many certifications under IFC guidance to improve the internal audit practices and monitoring to assure the quality of the products stored and transported.

### ***Board includes experienced independent directors from diverse backgrounds***

Snowman's board consists of eight directors, of whom four are independent directors. Two of the independent directors are from the logistics industry and other two have experience in the financial industry. The diverse backgrounds help in constructive contribution in the decision-making process during the board meetings.

We believe that board processes are in place. All the major decisions are discussed at the board meetings and the independent directors receive the necessary documents in advance. The company currently has four committees (audit, compensation, share allotment, transfer & investor grievances and IPO). The company's quality of disclosure can be considered good judged by the level of information and details furnished in the DRHP, websites and other publicly available data. Further, based on our interactions with the management, we believe that the management is transparent and forthcoming with information.
